Democratic-Republican Solidarity Laid Bare By Expose of Coolidge Deal

By J. LOUIS ENGDAHL.

TODAY, another flash of light streaks across the dark places in Wall Street's government in Washington, showing how the dollar dictatorship operates. The rampaging Senator Blease, of South Carolina, kicked up another foul-smelling old party dunghil when he exposed the fact that the republican president. Coolidge, had entered into a "deal" with the democratic senator, Underwood, of Alabama, to pad the interface of the control of the control of the country of the count

ultra-reactionaries.

The revelations should give another body blow to the pot "balance of power" theories, not only of the LaFollette-reactionary farmers' bloc in congress, but also of the official-dom of the American Federation of Labor, which makes it the basis of its "non-partisan" policy inherited from the regime of Sam Gompers.

Coolidge definitely develops his plan of winning, not only the unity of his own party in congress, but of allying with this power all available democrats. The present exposure shows how places of prestige are used to win over susceptible democrats in this case Underwood, perennial presidential possibility on the democratic ticket. Coolidge uses this added strength, as has been repeatedly shown, to beat his own insurging party members in congress into line.

surging party members in congress into line.

The case now in the linelight is typical. Two places are open on the powerful interstate commerce commission. The senate in its last session held up the confirmation of Thomas L. Woodlock, of New York, but Coolidge, nevertheless, gave him a recess appointment. It must now come up for approval. Coolidge still sticks by Woodlock. In order to have his appointment confirmed, Coolidge calls Senator Underwood to the White House and asks that he fill the other vacancy, thus winning democratic support.

Underwood does not resent this approach. He does not accepted. Taylor, of Mobile, in his home state, and the suggested Richard V. Taylor, of Mobile, in his home state, and the suggested Richard V. Taylor, so may be a controlled to the confirmation of the Mobile and Ohio railroad. Cities in the reactionary south know where oget their mayors, and when Coolidge picks one of them for a job under his republican administration, he knows it is difficult to find anyone more conservative.

Thus the republican-democratic compact in congress grows. The "balance of power" theory is based on the supposition that republicans and democrats are opposed to each other, and that a small bloc can exercise influence by swinging its vote back and forth between them. The A.F. of L. mon-partisan 'idea also based on the same and the properties of the configuration of the configuration

With these dreams of a short cut to power effectively shattered labor will be able to build on a firmer foundation in the creation of its own class strength. Against all fruitless maneuvers within the old parties, the building of the class labor party

Propaganda for Dawes Plan

Propaganda for Dawes Plan

The press of the United States has for weeks been carrying atories parporting to describe the economic conditions in Germany. An analysis of the reports reveals the most astonishing falsification. According to these reports Germany is setuldly rising from the ruins of the world war and its aftermath that sent the mark crashing to such low levels that it became interfy worldless.

As a matter of fact the Dawes plan for Germany, which was an inventory of the industrial resources of the country and a survey of the degree of exploitation that could be imposed upon German labor, had the offect when the first heavy loans were doared of slightly reviving industry. But no sooner was the plan made operative than the Inherent contradictions of capitalism showed that the Dawes plan itself would produce a serious European crisis.

England participated in the Dawes plan hecames she hoped that if Germany were forced to pay enormous sums to the deduce nations be could not sell their industrial products low enough to compete with Diritish industry. The United States wanted to revice German in dustry so that country would firmide a place for increstments of hank capital. Whereas Diritish influstry the content would firmide a place for increstments of hank capital. Whereas Diritish influstry is comply the markets of the world is more than adequate to supply the markets of the world and that if German in starty is everled and pronged that is to be basis of 1911 it will create a crisis in industry of the industries of the world is unover than adequate to supply the markets of the world and that if German in categories in the new hand the capitalist press spends of the revival of German in the one hand the capitalist press spends of the revival of German in the one hand the capitalist press spends of the revival of German in the case plan?

Why then he we have this exaggeration of the effectiveness of the tawes plan?

Our the one hand the capitalist press speaks of the revival of tier, many while deporting the pathetic condition of France. Some publications actually compare the condition of the revo countries and arrive at the conclusion that a similar plan should be imposed upon France. And a Dawes plan for France is the sum and substance of the propagation in factor of the Dawes plan in Germany.

Finance capital in the United States ever strives to find new spheres of investment, otherwise it will smoother under its own accumulation. But when it seeks places of investment in wants to create condition most favorable to itself. The one fact to be kept in mind's that England and the United States are the two great content ing imperialist powers. Wall Street strives to create thriatin. This can only be achieved by creating powerful allies in Europe. If the france is better down to such a point that a lawes plan is imposed upon France, it will be handled by the United States alone, without Britain and against Britain. American bank capital, now dominating thermany, will soon dominate France, then under the negls of bank capital can be brought about, what faree failed to accomplish by military might—the ronoolidation of one industrial unit can britance in the comparent in the strange he gradies its only formidable imperialist rival.

Every act in the arman of imperialist stringels legislation of the realize this fact and perquare releattlessly and at any secrifice to rombat these prepara tions for a new world sharping must be to realize this fact and perpare releattlessly and at any secrifice to rombat these prepara tions for a new world sharping must be to realize this fact and perpare releattlessly and at any secrifice to rombat these prepara tions for a new world sharping must be to realize this fact and perpare releattlessly and at any secrifice to rombat these prepara

Rally for the Agitation Drive to Aid Labor's War Against the Food Trust

By J. LOUIS ENGDAHL.

TODAY, every possible atom of strength of the left wing, the Workers (Communist) Party, the Young Workers (Communist) League and The DAILY WORKER, that can be spared, is being mobilized for an extensive agitation campaign in the far-flung meat packing industry employing hundreds of thousand of workers,—men, women and youth

dreds of thousand of workers,—ment, workers are year.

Aborth, bitter exploitation of labor in 'the yards' of Chicago, Omaha, Kanasa City, East St. Louis, St. Paul and other food producing enters, here it the product of the workers many gripping pages in American labor's history.

Upton Sinclair worte his "Jungle" that stirred a nation. Not in it3 mind, however. The brutalizing conditions impedation to the slaves of "Packingtown" were forgotton in the nation's teror at the fifthy diseased food that was prepared for it, in Chicago, in the name of profits. It was hit in its stomach.

It has long been motorious that policy terrorism is the regular procedime in Universe. Practices of the boly Roman imputsition are specified by the procedime in Universe. Practices of the boly Roman imputsition are the imputsition is the fact that in theory confessions obtained that frightfulness are not recognized in court. But of fact this is overcome by the whole reptile process coming to the aid of police terror by affectsing the prisoners of benishing themselves and raising the cry of between the resulting the prisoners of benishing themselves and raising the cry of between the resulting in common with scientific procedure. As long ago as the close of the eightreath country the classic school of criminology areas to comfant torture of suspected persons. That school has been superseded by the post vicinities and attachment separatus, the science of criminology from police and legal peractice today of such methods will not available. The only way to corporate school a condition is for the workers to read, can

Protesting against the bestiality of such methods will not avail, and way to overcome such a condition is for the workers to reach sticle a stage of addition understanding that city, state and national governments will be administered by a class party of labor, where cline is approached in an intelligent manner. In the first place, most of the crimes committed are crimes against property and poverty is the one and only range. Remove poverty thru assuring every worker an opportunity to care a living and periodic "out breaks" of crime will vanish.

Morawhite we, as Communists, expose the system of police implicition as having its rects deep in the slime of the capitalist political system. The capitalist newspapers support such herror because they know spch methods, once in vegue, are effective means of fighting working class movements.

Chicago's Wall Street BANKER SEES Now Appears Openly as Daily Newspaper Owner

By J. LOUIS ENGDAHL

TODAY, LaSaile Street (the Wall Street of Chicago) is un-ODAY, Lasalie street (the Wall street or Unicago) is un-veiled as the new owner of the Chicago Daily News, the powerful afternoon newspaper property left behind by the late Victor F, Lawson. Creat capital does not often like to appear openly as the owner of a daily newspaper, that must depend upon the masses for readers. But the new backers of the Daily News have cast even this caution aside.

James R. Otis, president of the Central Trust company of Illinois, is announced as the leader of a number of bankers that will hereafter own the Daily News and dictate its policies. This is the bank with which Vice-President "Hell an Maria" Dawes Is connected. This bank has been charged with and shown to be guilty of some of the shadlest deals in the financial world, of which its participation in the Lorimer

the financial world, of which its participation in the Lorimer scandal is but one example. The position of the bank is shown in its close connection with the "open shop" Landis award in the building trades, while its attitude toward labor is further supplemented by the pay-triotic principles of Dawes' "thinker Men of the Constitution of the Con

den, and some industrialists.

The "open shop" thread runs distinct thru the whole list of anmes. Only a few of the names of the bitterest enemies of the workers need be cited to typify the lot. There is Reuben H. Donnelley, vice-president R. R. Donnelley & Sons, enemy of the printers' union; John W. Leary, president of the United States Chamber of Commerce, that claims to have initiated the Dawes' plan, and James A. Patten, the food speculator, supporter of the Landis award for the establishing non-union conditions in the building trades. The list is interesting. Here it is in full:

It is announced that Sam Insuli, the electric light, gas and phone care of Chicago, as well as large sections of the United States, is not among the purchasers. Evidently the new owners feared to have the sheet labelled from the start as the organ of Chicago's great public utility interests, privately owned. But the banks that dictate the policies of the control of the control of the property of the control of the property of the control of the control

Workers should especially pay attention to the fact that the great non-union concerns in Chicago, like the International Harvester Co., Montgomery, Ward & Co., Sears, Robuck & Co., the packing interests like Swift & Co., among many others, will from now on be more actively engaged in shaping the policies of the Daily News.

These are the enemies of the workers, whose cause will be supported, every times a worker puts down his two pennies and takes up a copy of this anti-labor sheet.

The workers can fight their enemies, this fortified state of the workers are the enemies, the fortified state of the workers are make it more powerful than all the kept organs of capitalism.

Try to Resurrect the Memory of Wilson on Birthday Anniversary

By J. LOUIS ENGDAHL.

TODAY, American worshippers of the league of nations join in celetization of the birthday of the late Woodrow Wilson. The occasion is seized upon as an opportunity to spread more propagands for the entry of the United States into the league. The New York Times labels 1925 "A Wilson Year," and trist olivide the world "as between Lenin and Wilson." The Times declares:

es declares: "Basic to the Wilson (dea was an ultimata faith in the social h had been so sorely tried by the war."

which has been so sorely tred by the war.

This means that Wilson believed no social order could be imagined superior to the capitalist social order that spawned the world war; an idea, of course, that comes in direct conflict with the teachings of Marx and Lenin, who point out that capitalism within itself carries the seeds of its out that the trust nake way for the higher social destruction; that it must nake way for the higher social

Order—Communism.

Wilson carried out his "faith" in capitalism, that was to "make the world safe for democracy," by jailing asyone in the United States opposing the war and superssing newspapers and all other literature sell and the least the least the least of the least the least of the least the least the least the least the least the least the league, the international court of justice, the cardinal may back international court of justice, the concarno agreement, and the agent general of the Dawes plan all "operate in essence, along Wilson ines."

All this to the glory of the House of Morgan: entrenchabrond.

Wilson feared the teachings of the last on and

ing the power of American finance capital, at home and abroad.

Wilson feared the teachings of Lenio. His attorney general, J. Mitchell Palmer, launched the raids against the Communists in January, 1920. During the Busian, in spite of the Little States made open stream of the Russia, in spite of the American gold was hurried to the aid of every capitalist state in western Europe, crumbling under the assaults of revolutionary labor. Wilson's Herbert Hoover, getting his inspiration from Wall Street as well as Washington, launched his successful attack against the Hungarian Soviet Republic.

But the power of the Union American Street within the capitalist and the street was the successful attack against the Hungarian Soviet Republic. But the power of the Union of Mestern Europe, that Wilson's Wall Street government temporarily saved from triumphant revolution, there have sprung up powerful Communist parties directing the continuance of the struggle.

The world war and all the events during the seven years since have proved correct the teachings of Marx and Lening Wilson's league of war is inciting a new conflict between Turkey and England; it has soliditied oppressed peoples across the world's two greatest continents, from Morocco, in North Africa, to China in the Far East, against European imperialism. Germany agonizes under the Dawes plan, which the best authorities claim impossible of fulfillment, while the Oeure, of Paris, publishes an article on Wilson's birst-day showing Wall Street with it; whiphand over capitalism to the Course of the Wilson's Dawes plan, which the Course of Paris, publishes an article on Wilson's birst-day showing Wall Street with it; whiphand over capitalism (in the World's Course of Paris, publishes an article on Wilson's birst-day showing Wall Street with it; whiphand over capitalism (in the World's Course of Paris, publishes an article on Wilson's birst-day showing Wall Street with it; whiphand over capitalism (in the World's Course of Paris, publishes an article on Wilson's birst-day showing Wall Street with it; whiphand over capitalism (in the World's Course of Paris, publishes an article on Wilson's birst-day showing Wall Street with it; whiphand over capitalism (in the World's Course of Paris, publishes an article on Wilson's birst-day showing Wall Street with it; whiphand over capitalism (in the World's Course of Paris, publishes and Parishes of Wilson's Wall Street with its whiphand over capitalism.

"If there is peace in Western Europe there is no hope for Communist ideal in Western Europe," says the New

York Times. But almost every day the same New York Times reports vital clashes of conflicting capitalist interests in this small patch of the world's land surface, the terms to the install patch of the world's land surface, and the rest of the world surgean capitalism, confronted on the one hand by the Soviet Union, and on the other by aroused colonial and subject peoples, while facing discontent at home, is a doomed European capitalism. It will be buried with the memory of Woodrow Wilson. Lenin's teachings live and grow in power to inspire greater efforts for the victory of the new social order.

The Old Party Politicians Are Very Much Worried About Farm Discontent

By J. LOUIS ENGDAHL.

TODAY, the politicians are werried about the "embattled farmers." This includes not only the spokesmen of the Coolidge republican administration, but the democrats as well. Both begin to wrigger more than ever under the thumb of loncessing mass discontent among the land workers. They realize that there is much mere from North Dakots, Montant and Washington, down thru the middle west into Okiahoma and Texas. The farmers are bent on an independent class attack on both the Wall Street parties that have made them so many empty promises offering full remedles.

Some of the western states, now the centers of the greatest discontent, were ardent supporters of Coolidge at the polls last year. In little more than 12 months the balance has turned. The farmers are on the warptal against Coolidge.

The farmers and administration at Washington is full made by Predicent Coolidge to Chicago to address the American Farm Bureau. Before this gathering of politicians of this turnever, was shown in the hurried trip made by Predicent Coolidge to Chicago to address the American Farm Bureau. Before this gathering of politicians of this farmers and little, business emm, who feed of the working farm population, Coolidge gushed rivers of the working farm population, Coolidge gushed rivers of cornered about the prices received to Farm Brueau yelled the distribution of the working farm population. The last made him look as if he didn't often get close to the soil, Mynn the picture was published in the keyl fress, for political purposes, it had quits the worne effect among real distramers. It was to them a good comic.

farmers. It was to them a good comic.

The farmers have taken the starch out of Coolidge's pretensions before the Farm Bureau. Other advances are now in process of initiation. The 1926 elections are coming on and the republican grip on some western states is openly menaced. It is announced that "Silent Cal" is now ready to appoint a commission to dispose of the surplue production of the farms. This is supposed to refer especially to the corn bet centering in lows. But again, it would help little to dispose of the surplus if the price is below the cost of production. So far the president has eet his face against all forms

of price fixing.

One of the greatest assets of American capitalism is its home market. It protects its manufactured groods for the enjoyment of this home market thru high tariffs, ship out foreign competition. Similarly, one farm panacea now offered is high protective tariffs for farm products. But this would only help complete the circumference of a vicious circle. Higher tariffs on farm products, would mean an increase in the price of these same products, resulting in a mounting cost of living for the industrial workers. This tain their living standards. Every inch gained, however, would be seized upon by the private owners of industry to increase the cost of industry's products, that the farmer must buy, thus in turn raising his cost of living.

The drive toward the movement for independent political

must buy, thue in turn raising his cost of Irving.

The drive toward the movement for independent political action shows that increasing numbers of farmers realize the vicious grip in which they are held under the present social system. In the words of William Bocks, president of the words of William Bocks, president of the WE KNOW THAT THERE IS NO CURE FOR THE PROBLEMS CONFRONTING THE FARMERS UNDER THE PRESENT CAPITALIST SOCIAL SYSTEM."

The politicians at Washington are worried. They have great need to be worried.

The All-Russian gilding competition was marked by great successes on the part of the Russian gilders. The pilot Arasulov reached a height of 300 metres above the starting point. The pilot Umashor flew a distance of 4 kilometres without stopping. The pilot Yakorchuk remained in the air for 9 hours 45 minutes. This pilot now holds the second place in the world records for length of time in the air.

Moral and Unmoral Nations

Moral and Unmoral Nations

As a holiday theme the ultra-imperialist New York Times editors the control presents. These nations, then accepting the terms may be a the control present the

moral nations:
A to the treaty between Russia and Turkey neither pairy is concerned about the opinion of the organs of the House of Morgan, beyond knowing what their plans may be. At a noment when the Angora government is hieractered with war by the tory government of England it is but natural that Turkey should turn to the only powerful friend of oppressed nations on earth—the Union of Soviet Republics. If, at any time, the present or any future government of Turkey forgets the dield it wose the great protelarian power that added it in its hour of dire need, we can rest assured that the working class of the Angora republic will not forget, any more than the German probletariat will forget.

The tarmers have Coolidge seared. But the only way to really threaten capitalism is to sign its death warrant and carry it out.

Berger's Discourse on Taxation

Never was there a greater opportunity for a working class spacesman in the homes of congress to expose the frameholean nature of the capitalist government than during the relation to the Melhon for the capitalist government than during the relations to represent the working class to relate the claims to represent the working class to relate the claims to represent the working class to relate the claims to represent the working class to relate the claims to represent the survival of the considered that the measure proposed by Melhon depote our a promise of a rapid breakdown of this system by a fear ful concentration of wealth."

Here is reformist swellism in its most degmatic form. Instead of exposing the true role of the United States government which has reduced the status of the true of the latest special to the capitalist system. Here is not government Representation of wealth and the resultant "breakdown" of the expitalist system. Such an analysis fails in silty in the about the concentration of wealth and the resultant "breakdown" of the expitalist system. Such an analysis fails unterly to expose the nature of the equitalist state. The present heavy traction, which has accumpanite concentration of wealth, is surely not indicative of the Perakdown of the capitalist system. It means that the power of the government lab being centralized and strengthened and the shifting of the tax hurden to the middle class simply means that this class is to be forced to pay tribute to the method by which the capitalist flumers the government and not induce in hourself in the power of the payment and the sheared of the work ing class would expose that disintegrates the equitalist system to the extent that wealth concentrates.

The recotalizions was established over fail to expose the character of the capitalist sate and would emphasize that in the proper of the expitalist may be approximated the surface of the control of the work of the country.

The reconditions the determination of the worki

THE U. S. IN ITS RELATION WITH THE WORLD ECONOMIC SITUATION

The proper understanding of the economy of capitalism, both in its general aspects and in its form at any given time, is the first requirement of those who claim to load the struggle for the overthrowal of cap ment of those who claim to load the struggle for the overthrowal of cap-tilation. It is not enough to slope at the knowledges of the seneral trend of explaints reconstruct, to understand merely that capitalism, like other systems preceding it, in element to perish. It is not enough to recon-alize, in fact it is dangerous to preced into a conflict with the force of capitalism in any field, without the general join of examples being head upon a minute examination of the relation of forces at the time massen upon a minuto examination of the relation of forces at the time of routiet and a concrete analysis of capitalist economy. Such analysis of the present eronomic situation of capitalism in the United States, we give below as written by Euron Varga, the leading economic expert

of the Communist International:

Money World Reioices at New Year's Over Great Prosperity It Is Enjoying

By J. LOUIS ENGDAHL.

TODAY, the year 1925 draws to a close. The kept press overexers itself to prove that the year has been prosperous not for the workers, but flower the year has been prosperous not for the workers, but flower than the prosperous not for the workers, but flower than the financial flower than the financial

Of course, just as soon as the workers get busy in other industries, the bosses will immediately plead poverty. The railroad owners have had their best year, but the workers have suffered, their unions broken and class-collaboration schemes foisted upon them. Great profits in steel, dil, automobiles, meat packing and sisswhers are accompanied with new threats of wage cuts to be forced upon unorganized, bitterly exploited workers. The whole subhidized press will labor its getting plenty, that capital must have more.

labor is getting plenty, that capital must have more. Figures already prepared tend to show that the country's favorable balanee of trade for 1925 will reach \$600,000,000. It may go to a billion dollars. American great business has sold that much more than it has bought during the past year. That is part of the rainbow. The capitalist economists carefully attempt to explain away the blue streta in it, however. They try to argue away that there is danger that the indebtedness of other nations to American imperialism is increased by that amount. It is pointed out, with great pride, that the nation's business has sold \$865,000,000 worth of goods to South and Central American in 1925. That is about \$11,000,000 more than the third that the tendence is the sold \$865,000,000 worth of goods to South and Central American in 1925. That is about \$11,000,000 more than the try commence that the consent countries are looking with jealousy upon this market; that they will struggle to win it. Business professes no fear that Wall Street's financial domination over these same countries will develop future uprisings among these peoples against dollar degradation. New Year's day, is a time specially set apart to look at the rosy side of the picture.

the rosy side of the picture.

The usual alibi provided by the kept economist is that American tourists in foreign lands will scatter enough gold to wipe out the trade balance, when it is added to other incidentals of Wall Street rule abroad. Thus George W. Hinning of the wind of the street rule abroad in the George W. Hinning of the street rule are the street at the street are the street who feared to have a money belience in his favor at the end of the year for his prefit and pieseure?"

The spectacle of the profit parasites of this country trying to squander the billion dollar trade surplus in rictous living at foreign Monte Carlos should surely open the eyes of the workers. Labor might steal these words out of the mouths of crease wages and the purchasing power, of the workers at home. But that goes entirely contrary to the eager profit hunt of the capitalist system.

Neither does the trade surplus represent the entire flow

Neither does the trade surplus represent the entire flow of alien gold into this country. It does not take into account the vast investments of American capital drawing dividends in foreign lands, of the Amounting interest on increasing foreign loans and other hugs sums accruing from Wall Street's financial conquest of the world.

The fact is that New Year's, 1926, proclaims America again the Midas of the world. Just as Midas could not live as everything he touched-turned to gold, so American capitalism, richest and most powerful on the face of the gold, will succumb to the contradictions within the capitalist system itself. The proud boasting of the American dollar world at this New Year's season should spur workers at home, in alliance with the oppressed poples abroad, to prepare for greater strugglos against It.

British Miners Issue Appeal to All Union Labor

LONDON, June 30.—The British miners have placed their case before labor in a letter to all trade unions. They state their position and that of the owners and the government. They point out that both owners and government demand reduction of wages and lengthening of hours. The miners themselves will not accept these lowered standards, and demand recognization of the industry, maintenance of the national agreement and maintenance of the same wages and hours as before the lockout. The reorganization they demand has been accepted in its main outlines by four government inquiry commissions since 1919.

since main outlines by four government inquiry commissions since 1919.

From the other labor unions the miners of England demand financial aid and an embarge on coal. The rank and file of transport workers are increasingly indignant at the failure of their lifetals to order a boycott strike against coal. In many ports in workers are refunding to unload coal, even when their refusal as made in tilrect violation of their officials orders. The miners in the control of the interval of the miners is now entering its ninth week. Parely from the "parelleral" standpoint, stressed so often by
force who want to keep the farmers and workers in the parties of
bloom, independent political action by farmers and workers,
leads to their communic organizations, is the best way to get results.

Another "Friend" of Labor

Another Friend of Labor, I did support Says, John Walker:
As president of the Illinois Federation of Labor, I did support Smith for senator because he was more considerate to the interests of labor than was Senator McKinley.
So in order to get more consideration for "who interests of labor," John Walker, as president of the Illinois State Federation Labor, supports Frank L. Smith, a republican candidate, where the endorsement of and who is supported by the traction pilalists, the Commonwealth Edison, head and from of the opin movement in Illinois, and by other powerful public utility

snop movement in Himois, and by other powerful public utility corporations.

This appears to same workers as a rather strange procedure but it is the logical result of the "monpartisan" policy which, disappointed by a democrat henchman of the bosses, turns to a repulsion as good for the same class for relief. Disappointed again, a return to the democrat vomit is in order and so on.

John Walker was once an advocate of the labor party. But this was in the inglorious past before the primary shish funds were dispensed with such liberality and before Himois labor afficiation had cased its way into the secret places where baselous melons are not by candidates of the open shop interests.

If the investigation of the huge femals and brilery, made possible by the primary law, severes no other purpose it will at least start many workers to thinking a little about the connection is ween injunctions and for wares and the fact that labor union-officials are a part of the parties of the bosses.

Why Not Defend the British Miners?

A FEW days after this great strike, when the results of the capitulation had been ascertained, the authors of that same capitulation forgot to tell us how "a demonstration of power" was transformed into the greatest demonstration of impotence ever seen. They forgot to tell us who, and why, brought the whole thing to a debacle. More: they even try to defend this incredible capitulation by qualifying as "a courageous (!) gesture of peace" what the English worker calls treachers and cowardice. Again, the miners are still out; are they in the right or not? Should they identify themselves with the General Council's "courageous gesture of peace" or continue the struggle? Should the miners be supported or not? How is it possible when a million workers are out on strike for such a question to be passed over in silence? a question to be passed over in silence?

"Throw the reads republicant out" and put democratic field in the same of the sam PRECISELY by doing this, this statement addressed to all and sundry, whitewashes the shameful action of the General Council in the strike. It directs and focuses the minds of the workers on a false road; with fine sounding phrases it patches over the crassest treachery and cowardice; it justifies a crime committed against the working class of Great Britain.—A. LOSOVSKY.

When, in the rourse of human events When, in the returns of human events, it becomes necessary for warkers to dissolve the political hands which have bound them to the old parties, and to assume with other workers all over the world an equal station by taking rights to which flefore all laws we are entitled, a decent respect to the upinions of mankind requires that we should declare the separation and join with revolutionary workers everywhere.

We hold these truths to be self-evident: A Labor Party of our own is most necessary; to this end and to secure not only the full product of our toll has even the most elementary needs—and for the promotion of the interests of workers in all respects, The DAILY WORKER is most mecessary.

WHAT better day than the Fourth of July, the anniversary of
American independence, achieved by hungry and ragged
workers and farmers, for American labor to pledge itself to:

(1) Free Sacco and Vanzetti.

(2) Release of the Chicago garment workers and a
renewal of the fight against injunctions.

(3) 100 per cent support of the strike of 40,000 New

Secretary of Labor Davis' Letter Congratulating Elbert H. Gary on the "Safety" Work of the Steel Trust.

DEPARTMENT OF LABOR

OFFICE OF THE SPCE

Honorable E. H. Gary, United States Steel Corporation, Empire Building, Them York, N. Y.

Dear Judge Garys

I have just been going over the records of the United States Steel Corporation in the matter of socident prevention and safety work. The record is such a remarkable one that I cannot refrain from telling you have accredingly gratifying it is to me or from complimenting you upon a really wonderful achievement.

Accident statistics for the iron and steel industry have been kept in the Bureau of Labor Statistics of this Department going back to 1907, during which time the Commissioner of labor Statistics informs be frequency coldent rates in the industry have dropped from 80.8 per million one man hour exposure in 1907 to 30.8 in 1924, and that the sweetity rates have dropped for 7.2 to 3.

More satisfactory still than this is the sohievement of a smaller group of plants composed largely of the United States Steel Corporation's subsidiaries, and in which more energetic and yetnessic methods have been installed and tennelocuty scheme to in this group of plants the frequency ratio has dropped from 80.3 per million hours, of exposure in 1915 to 10.2 in 1924, and this group contains mearly one-half of the from and steel industries in the United States;

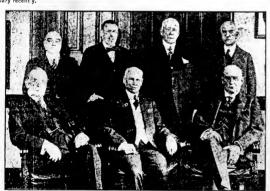

What especially pleases me is your reported statement that the United States Steel Corporation has found that seeddent prevention and safety work really pays from a dollar-and-cents point of riew. Tour arreported as having stated that the United States Steel Corporation in ten years spent 89,765,065 in accident prevention work and that the money saving resulting therefrom had been 143,609,301 addition to the fact that 250,000 men had been saved from injury, and probably mor Sham 40,000 and been saved from itself allury.

As a milt-insurer the United States Steel Corporation is in a position to know whether or not there is an actual money gain to be derived from intelligent accident prevention mork, and this statement of the Corporation's appriance will be of in-astimally make to me in reaching this Percentage of confloyers with whom the humanity appeal does not get one very far, and to whom you must show a chance to save money or they will not get along.

Once more, I wish to compliment you on this splendid record, and to assure you of my highest regards and esteem.

The close connection between the Steel Trust and government officials who are supposed to look after the interests of wage-earners, is shown by the above facsimile of a letter from the sec-retary of labor to the head of the United States Steel corporation.

Here are pictures of the responsible heads of the United States Steel corporation, of which Illinois Steel company is a part. These are the men who look after the interests of the stock-force which others for dividends is responsible for such disasters as that which occurred in

oon after this it was time for Bunny to visit his mother.

Soon after this it was time for Bunny to visit his mother. Bunny's mother did not bear Dad's name, as other boys' mothers do; she was called Mrs. Lang, and lived in a bungalow on the outskirts of Angel City. There was an arrangement where the state of the control of the contr

The New York Traction Strike

The New Tork Traction Styries

More important than the number of non-involved in the Interborough subway strike in New York is the fact that it represents
a break with the company union that has been folieted on to the
workers of this great triction company.

That the uncoment out of the company union is not confined
to the subway one is shown by the fact that in the meeting where
the strike vore was taken, a number of elevated gorkers appeared
an amounced that they, not, had quit the company union.

As we go to press it is not clear how successful the strike
is, but enough can be gathered from the disputches in the capitatist
press to indicate tremendous dissatisfaction among the fraction
workers.

Nowhers, Such developments are of the greatest importance for the labor movement. They show that not even a continuous harrage of anti-muon propaganda, such as the "welfare" agents of the Interborough delage the workers with, can prevent the spread of trade union organization and strike action when the organizational weakness of the workers tecomes translated into a lovered standard of living. The myth relative to the tremendous difficulties of organization work among the employes of decisive industries like the traction tensi in generic New Vork, energetically spread by certain trade union officials, is skattered by such spontaneous revolts of unorganized vorkers.

It is becoming plainter each day that the split in the republican party is the most deep going in its history, the agricultural and middle class west against the big industrial and translat capitalists with the open corruption of the primary a uniform second and the world court issue a political basis for a far more powerful, antiold guard movement that the Roseevell bold rend buyest of.

The deletal of ('toddege is almost a foregome conclusion and a now party is in the making, but whether it will blossom forth for the 12% elections can be better forceast as the speeches of the sentants and congressmen on their return home begin to indicate the system to which the anti-foundage revolt is expalabiling into a movement that cannot be contained by the republican party.

UNION ORGANIZATION IS ON THE **UPWARD TREND IN RAILROAD SHOPS**

By LELAND OLDS, Federated Press.

Trade unionism in reliread abops, after one of the most severe crisis in the history of American labor, is on the upward road again. This is the bogeful noise travels in the report of officers to the severant convention of the railway employer department, American Padaration of Labor, which opened in Chicago, June 25. The report shows an inherest visitisty in the labor moreoment which even the government combined with the employing class could not crush.

Smashing Company Unionism

Smashing Company Unionism

The strike of the motormen and switchmen on the Interborough system in New York City is something more than a stringle for higher wages and better conditions of lubor. It is the first effective revol in this country against the shameful fraud of company minonism. The management of the Interborough, under the direction of its president and general manager, the attite and unexamplations labor exploiter, Mr. Frank Heilter, and his totally debased lunkers around Patrick J. Jonnoully, head of the company minon, has been able for ten years to hold the workers on the subways and elevated lines in a state of abject shavery.

All the trappings that accompany "welfare work" in industry were used to the limit. The railway lutletline were nameotting products of designed propagated to keep the workers in utter known, and the strike of the subways and elevated lines in a state of abject shavery.

All the trappings that accompany "welfare work" in industry were used to the limit. The railway lutletline were nameouting products of designed propagated to keep the workers in utter known, and the strike of the subways and the strike the following personal interest stories butter 7 to 18 had a strike and the subways and workers as orane big family. Meanwhile the lought and patd for tomoly and other levels of the Twenty is only the explosion of forces that hard level at work a long time within the company union. For three years Edward Lavin, Harry Bork, Joseph Phelan and others had been putting as tight against territic odds in an effort to break thru the company in felters. The rest of the labor movement has despaired of vinning the traction workers and the subway and the subways and the company union at the first upon the men of the himserable wages they received. Not any form of company union at law, and the subways and the company and in silence, held down tha

A New Drive on Passaic

A New Drive on Passaic

A new drive against the Passaic strikers has been started by the business interests of Passaic and merby communities under the leadership of the textile barons.

A meeting, which dispatches describe as composed of "tending clerggma, professional mera, bankers, manufacturers and citizens."

The chairman of the meeting, an alderman, announced: "We may prote to the swelvers to rediffer that radical leadership can only lead to tass and follow, to believe that radical leadership can only lead to tass and follow, to believe that ther among their own prople are their periods.

The president of the chamber of commerce attacked the strike publicity as various one and seendadous!

The similarity of these uttermores of the parastite element of Passaic with the recent statuement of the American Federation of Labor executive council will be noted immediately. The A. F. of Losfielias tatack the strike and advise against money being sent to the strike committee and the hangerson of the mill borons follow.

the strike committee and the hangers on of the mill barons follow with. Must is the meaning of this new offensire, the attempted frame not Weishord, the renewal of violence against the strikers? Simply that the textile barons are rying to break the strike season. They are recriving aid in this scheme from labor officials who should be rullying the trade union movement to the assistance of the Passaic workers whose stringle in the face of unrestrained violence has aroused the admiration of every honest worker in the United States.

This is the crucial period of the strike.

The textile barons know it.

They are everifing every onnes of pressure they can upon the middle class elements in the Passaic textile district, intensifying their press campaign and trying to democratize the ranks of the strikers.

striker).

Support of the strike must not slacken.

The puswer must be given to the textile barons by American labor in the form of increased aid to the strike in this period. It there is no desirtion of the Passair workers by labor, the new of femsive of the null owners will fail and the victory of the Passair strikers will be the beginning of similar victories in all textile centers ending in organization of the entire industry.

This is what the textile barons are afraid of and one of the principal reasons for their new drive.

"No, they're not like that, they're proud; Mrs. Groarty says
they wouldn't take mousy from you, any more than Paul would,

help that. Or you might buy the ranch, Dad, and rent it back to
them. Paul says there's oil on that ranch—at least his Uncle Eby

"There's thousands of ranches jist like that in California,
son. Oil on top of the ground don't mean anything special."
"Well, Dad, you've always said you wanted to try some wildcatting; and you know, that's the only way you'll ever get what

Paradise, and drive through there and camp out a few days and
get some qual, and we'll see what we think of it, and we'll help
flose poor people, and give your kitheya a rest at the same time."
So Dad said all right: and he went away thinking to himself:
"Gosh! Funny kid."

The San Elido valley lay on the edge of the desert, and you crossed a corner of the desert to get to U; a hare wilderness of sunbaked sand and rock, with nothing but grey, dusty desert plants. Supped along typen a fine paved road, but the land was named by the souls of old-time planers who had crossed it in covered wagons or with pack-mules and had left their bones beside many a trail. Even now, you had to be careful when you went off into side-trails across these wastes; every now and then a car would get sluck with an empty radiator, and the people would be lucky to get out alive.

could be lucky to get cut alive.
You could get water if you sunk a deep well; and so thereeare fruit ranches and fields of alfalfa here and there. There
ame long stretches where the ground was white, like salt; that
was alkali, Dad said, and it made this country a regular bookrap. The stranger from the East would come in and inspect a
new fruit ranch, and would think he was making a good bargain
or get the land leaved door for a hundred dollars an arcre; he would

to get the land aext door for a hundred dollars an aerc; he would set out his fruit-trees and paliently water them, and they wouldn't grow; nobling would grow but a little alfalfa, and maybe there was too much alfalf for that. The would-be rancher would have to pull up trees, and obliterate the traces of them, and set a real-extact to hunting for another boob.

Strapped to the running board of Dad's car, on the right land side where Bunny sat, was a big bundle wrapped in a water-proof cover; they were camping out—which meant that the mind of a boy was back amid racial memories, the perils and excitements of ten thousand years ago. Tightly clutched in Bunny's two hands were a couple of repeating shot-guns; he held these for hours, partly because they had to be carried in the open—if you shut them up in the compartment they would be "concealed weapons," and that was against the law. was against the law

that was against the law.

Near the head of the valley a dirt road went off and a sign said: "Paradise, eight niles." They wound up a little pass that seemed to be tumbled heaps of rock, of every size and color. There were fruit ranches, the trees now bare of leaves, with runks calcinitined white, and young trees with wire netting about them, to keep away the rabbits. The first rains of the season had fallen, and new grass was showing—the California spring, which be gins in the fall.

begins in the fall.

The pass broadened out; there were ranch-houses scattered here and there, and the village of Paradise—one street, with a few scattered slores, sheltered under euclyptus trees that made long shadows in the late afternoon light. Dad drew up at the filling station which was also a feed-store. "Can you tell me where is the Walkins ranch?"

"There's two Watkinses," said the man. "There's Old Abel Watkins—"

"That's the one!" exclaimed Bunny

campin outil. So the man gave them complicated directions. You took the lane back of the school house, and you made several Jogs and then there were about sixteen forks, and you must get the right one, and you followed the silde that took the water down to Roseville, and it was the fourth arroyo after you had passed old man Tucker's sheep-ranch, with the little house up under the pepper trees. And so they started and followed a winding road that had apparently been lail out by sheep, and the sun set behind the dark hills, and the clouds turned pink, and they dodged down into little guilles, and up again with a constant shifting of gears, There was no need to ask about the quali, for the hills choed with the melodious double call of the flocks gathering for the night.

The two of injunctions by the employers in their attempt to smask strikes of their employers for better conditions is become up more and more frequent. The power placed in injunction today is of such a character that it threaten the life of the anion leading the strike if it is obeyed. suffer from injunctions. And on some still later day the canployers may perhaps be permanently enjoined from practicing
their profession. Injunctions are all right.

THE use of the injunction in strikes against the workers is the best proof of the class character of our government.

The injunction also gives the lie to the shouters who praise our democratic institutions.

In the railroad shopmen's strike of 1922, the government secured the infamous Daugherty injunction which violated every right approach to be guaranteed to the railroad shopmen, among others by the American constitution. The Daugherty injunction dealed the right of freedom of speech, freedom of press, freedom to semblage. It denied the right to the railroad shopmen to use money of their own organization. And all this particularly the properties of the railroad shopmen was made by decision of our one injunction from Judge Anderson at Indianapolis against the United Mine Workers of America thru which the government, had be case been pressed to a final issue, could have completely destroyed this labor union.

The imprisonment of the Chacog Garnent Workers for violation of the injunction of Judge Shiliwan was the latest expression of an arbitrary power which is an great as any king or kaiser wielded during the absolute rule of the past.

It is labor that subsolute rules of the power of the government. It is labor which in a thousand strikes had felt the weight of the blow of injunctions. The Chicago Garnent Workers are the latest of thousands of workers who have gone to prison for contempt of court because they violated the one man rule of an injunction judge as was done by the Chicago workers. But soud ing strikers to jail for contempt of court is not the best method of affaining the injunction of does it bring to bear labor's greatest strength.

strength.

THE use of the injunction as a means of strikebreaking is a clarion call to the American workers to organize their political power on a class basis and to fight against the capitalist class and the capitalist parties for control of the political power. So long as the workers leave unchallenged the absolute rule of the capitalist politically, leaving the government in their hands, it must expect that that government will deal blows in support of the capitalists and against the workers, by enjohing them when they dare strike and putting them into prison if they dare violate the injunctions.

John Werlik

Business Agent Metal Polishers' Union, Local 6.
The injunction is the most paralyzing influence ever brought to bear in a strike situation.
It has no basis in ordinary legal procedure. Legal rights and constitutional guarantees are wiped out with the judges stroke of a pen.
As practiced by the notorious Judge Denis E. Sullivan no conclusive evidence of guilt is necessary in order that an injunction be issued against a labor union.
The most palpable frame-up by employers' agents is sufficient as evidence for the issuance of an injunction against a labor union.
The problem of overcoming this wind.

a labor union.

The problem of overcoming this vital difficulty by labor I suggest the election of labor's own candidates for judges. Huge mass strikes would also overcome injunctions, insampla as the capacity of our jails would not very materially affect the union picket liues.

Member of Local No. 478, International Association of Machinists.

Injunctions are tools of the employers and are used against labor when it goes on sirlke for an improvement of their conditions. In 1922 the railway shopmen learned their lesson. They learned to recognize what an injunction meant. That injunction was one of the causes for the failure of that sirlke.

The only remedy for labor is to fine causes for the

Tanure of that sirike.

The only remedy for labor is to form a political party of its own and see to it that these injunction judges are defeated.

The New Jersey Explosion

The New Jersey Explosion

Militarism takes its toll in both war and peace time.

No enemy threatens or can threaten the American masses except
the imperialist rulers and their agents.

This is the lesson of the U. S. naval arsenal explosion in New
Jersey with its long list of dead and injured.

The horrors of war are well known but the horrors of peace
under capitalist imperialism are well concealed from millions.

But here is a concrete example of the rultlessness of the American
ruling class in the form of maugled bodies of men, women and
children sacrificed by the war lords.

The New Jersey explosion should give a powerful impetus to
the anti-militarist movement. It has dramatized the menace of
militarism because it symbolizes the bloody struggle which it car
ries on night and day against the interests of the American masses.

On the Mediterranean-Atlantic coast, the defeat of Abdel-Krim by the combined Terench-Spanish forces has opened up another bornets' nest with Italy demanding a place in the sun here as well. In Syria, because of the stern resistance of the natives, the Trench-Spannanding officer has been forced to announce that the ministry of war must prepare for a campaign of major proportions or vididraw all forces.

In China new conflicts between the national army and the imperialist forces begin in the north while in the south the Canton government extends its boycott of Britain and British goods.

British industry is paralyzed by the coal strike. Prance is torn by the worst tinancial criss in its kintory. Unemployment is on the increase is Germany, latest estimates placing the number at more than 2,000,000. A Union for the I. R. T. Strikers

The strike of motormen and switchmen against the Interborough Rapid Transit company of New York is a militant display of disgust with and mistrust of the so-called "brotherhood" controlled by I. R.

. omelais.

It is an important strike, occurring as it does in the largest city
the United States, and it is dramatic and spectacular as municipal transit strikes always are.

But the strike leadership is making what appears to us to be a

n mistage:

That of trying to set up a union independent of the existing on in the industry—the Amalgamated Association of Street and

Electric Rallway Employes.

This is one of the largest unions in the American Federation of Labor, having 100,000 members according to the latest per capita tax figures and, judged by A. F. of L. standards, a well managed union. By that is meant that it has secured substantial improvements in wages and working conditions for its members and altho it follows a policy of making long-term agreements. It has conducted. y of making long-term agreements, it has conducted some of the bitter strikes and struggles for organization in the history of American labor movemen

There can be no question of this union being the dominant union

Its charter has industrial features which allows it to organize all workers employed by municipal transit companies and purely craft lines have been eliminated by the preponderance of motormen and conductors in the organization

and conductors in the organization.

To try to fight a company union, the company listelf and the

Tammany government of New York Uity while at the same time try
ing to organize a parallel union to the A. A. S. E. R. E., thus cutting

off what support this anion might be willing to give is poor tactics

snow woo sead afrikes have to take the responsibility and it seems to us the assumption of this responsibility in this case means advising the strikes that the success of the strike depends largely upon adhitation with and support from the existing union in the industry.

The Soviet Union's Monumental Achievement

"Remarkable progress is shown in the Soviet Union budget jub lished in Economic Life today," says a special dispatch to the New

ed in Economic Life today," says a special dispatch to the .

**Times under a Moscow date line of July 9.

The dispatch points out that for the second consecutive year Soviet budget balances and this year shows a surplus over all expenses of \$58,906,000

correspondent continues:

On the other hand, the deprived of the foreign financia assistance, which has kelped to balance the budgets of Germany and Italy, RUSSIA IS UNBIRDENED BY FOR-EIGN OR INTERNAL DEBTS, except some 200,000,000 rubbe (\$100,000,000) raised during the last two years. (Emphasis ours.)

(Emphasis ours.)

Contrast the tremendous implications of this simple statement—one of them being the fact that 110,000,000 people occupying one sixth of the earth's surface have a government run by thomselves on efficiently that the per capita debt is less than one dollar, the second being that the repudiation of debts to expitalist nations has brought not ruin but the reverse—with the financial crisis which paralyses France, the pawning of Germany and Italy to American imperialism and the choos in Great Britain the callance of Palest the paratyses grance, no passing or occusion and raty to American in-perialism and the chaos in Great Britain, the collapse of Poland, the succession of jupper dictatorships in Spain and Portugal, and one begins to realize somewhat the tremendous victory the Russian work-ers and peasants under the leadership of the Communist Party have

After years of struggle the Russian masses begin to reap the After years of struggle the Russian masses begin to reap the truits of that victory, sown in soil soaked with the blood of the best of their class. But it has been worth lite price they paid and while all capitalist Europe, in its string struggles, inflicts anbelievable steroy, conscious, alive and glorious, stands both as a monument to the social revolution and an inspiration to the toiling masses of all world

the world.

How plain it is that the Russian workers and peasants chose the right way and that those leaders of the masses in other countries who came to the aid of capitalism with reformist phrases have only postponed the inevitable struggle the masses must wage and in so doing have only added to the sum total of the sacrifices they must

ful attempts at organization in the past have left a bad feeling and, occurse, the company stoolpigeons are buys always keeping old suspicious allve and creating new ones.

This, however, is nothing new. Every labor organizer is familiar with the general conditions which prevail in unorganized industries. Upon the American Federation of Labor officials, the officials of the Amalgamated, and upon the strike leaders is the responsibility for giving proper direction to the struggle of the strikers and of those workers who are yet not conscious enough to quit the com-

Such opportunities ao not come often.

The continual failure to take advantage of them by responsible union officials is one of the chief reasons why the basic industries of America remain unorganized and a distrast of unions as such grown up among the unorganized who cannot be expected to draw always fine distinctions between the labor movement.and ita leadership

China Rises as a Nation

China has regained her control of her courts. Foreigners coming in conflict with Chinese law from now on will be subject to Chinese leant procedure instead of being able to claim trial by a judge of and under the legal processes of their respective nations. A powerful weapon in the hands of the imperialist nations, the Genner arrangement, in existence since the first revolution in 1911, has made it possible for representatives of foreign capitalist corress, missionaries and the international riffrall which collects along the Chinese peak.

along the Chinese coast, to perpetrate monators of Chinese people. Its abolition is an indication of growing strength of China as a nation and also an indication of the growing strength of the United States in the Chinese International commission. Full sover-elegity for China is the American policy based on the fact that she has no extra extractivitative rights in China. American imperialism has no extra extractivitative rights in China. American imperialist rivals in the contractivity of the contractivity o

Jurisdiction over foreigners in Chinese courts benefits di

Jurisdiction over foreigners in Chinese courts benefits directly the Chinese commercial and employing groups and it is knoped and doubtedly that this will result to weaken the anti-imperialist movement by placating the upper section of it.

But the workers and pensants of China are the driving force of the Chinese revolution; the young Chinese labor movement and the Knumlatang have grown up in the struggle against both imperialists and native exploiters. The abolition of foreign courts comes us a result of the struggles of the masses and not because imperialism has suddenly developed a conscience and a love for its Chinese business competitors. The singuificant that the recognition of the Jurisdiction of the Chinese business competitors in this when the combined attack of Wa 1210 and Chang Tsolin on the peoples' armies north and west of 1210 and Chang Tsolin on the peoples' armies north and west of New Lord and Chinese workers by the British forces in Cauton lumbor in an endeavor to heave the lorgent on Hongkong creating a new wave of bostility to imperialism which its agents could not ignore.

The Franco-British Debt Settlement

THE FIGHTO-DITTISM DOES SETTIMENT.

The Francoltritish debt agreement is a clever move on the part of two great nations, buth of whom are in conflict with the United States in various fields of imperlaits enterprise.

It links together the two strongest powers in western Europe and, by reason of the clause which provides for a cessation of French payments to Great Britain in the event of German default on resparation obligations, brings Germany into the combination while at the same time increasing British influence there.

"The formation of an All-European bloc against American imperialism is brought within the runge of probabilities by this scittement.

It was growing so cold that the little fire no longer sufficed for comfort; so the Waikins family took their departure, and Dad and Bunny set up the tent, and stowel their goods in it, and Bunny did his job of puffing at the nattress until it was full. The stars were shining, so they made their hed in the open. After spreading the blankets, they took off their shoes and outside clothing, and laid them in the tent, and crawled under the blankets in a hurry—gee, but that coid made you jump! Bunny snuggled up into a ball, and lay there, feeling the night breeze on his forehead; and he remarked: "Say, Dad, what is the Church of the True Word?"

We think that Coulding will run whether prosperity continues are not. But the direction be taken is the impurtant thing.

Cooldige is on the run right now. That much at best may be gathered from the frank statement of Cumunius. But with a slack ening of the activity in industrial centers and a currialment of installment buying, which the banks are already beginning to urge, he will begin to gallop, not towards but away from the White House, and as the rundle of resemented in the unblide west am west rolls eastward, it will take a panting posse and a detachment of the traithardened Haitian marins to find him. There is no haven for Cooldige out where the tall rorn grows.

British Apologists Discover Ford

Norman Angell, noted British publicist, has rundled in whether the desarrors a traited for the desarrors of the foot is cream for their services to American capitalism.

Desperate After Shop

WHAT HAS GOND BEFORE

Dad was busy frying the bacon and eggs, and he said they would like some of this morning's milk—which was a way to get rid of Eli. But it didn't take bil long to come back, and the said they would be some of the morning's milk—which was a way to get rid of Eli. But it didn't take bil long to come back, and mouths; and he told them that the family had "prayed a mighty power" over that yearthquake, and yearthquake meant the Holy Spirit was growing weary of fortications and drunkenness and lying in the world, and had they been doing any of them things? Bunny had but a vague idea concerning fornleations, but he knew that Dad had told; a whopping big lie just a short time before that "yearthquake," and he chuckled to himself as he thought what a portent the Watkinss would make out of that if they knew.

Watkins was a bigger and taller edition of his son, with the same prominent pale blue eyes and large Adam's apple; his face was weather-beaten, heavily lined with eare, and you could see be was a kind old man, honest and good, for all his cradness, lie too talked about the "yearthquakes," and told about one which had shaken down brick and concrete buildings in Roseville a couple of years ago. Then he said that Meelie and Saddewer going to sehool, and they would bring in some bread if the arangers wanted it. So Dad gave him a dollar, and they had a little, argument, because Mr. Watkins said they wouldn't take and the tateres at the store, and they didn't want no pay for the camping out, because that wasn't no trouble to them, they was ald to see strangers? It was a lonely life they lived up in these here hills, and if it wasn't for the lord and His Gospel, they would have very little pleasure in life.

VT

would have very little pleasure in life.

VI

Dad and Bunny strapped on their cartridge belts, which went over their shoulders, and they loaded up the repeating shot-guns, and set out up the little valley and over the bills, which were their shoulders, and they loaded up the repeating shot-guns, and set out up the little valley and over the bills. Hunny didn't really care very much about killing quall, he was sorry for the lovely black and brown birds, that had such proud and sately creats, and ran with such quick twinking legs, and thing about these ideas, because he knew Bud liked to hunt, and it was the only way yon could get him away from his work, and out into the open, which the doctor said was good for his health, lad was quick as lightling to swing his gun, and it locked as if he dinn't aim at all, but apparently he did; and he never made the mistake that Bunny did, of trying to shoot at two hirds at the same time. Also Dad had time to watch Bunny and teach him—to make sure that they travelled in an even line, and didn't.

Well they tramped the bills and the valleys, and the birds are compared to the same time. Also Dad had time to watch Bunny and dearh. Well they tramped the bills and the valleys, and the birds well that the same time would be others, they would hide and run, and you moved on, and hanged some more, until hanly you gathered up all you could find, bundles of soft warm feathers, spotted with blood. Sometimes they were sold and and, you had to wring teler necks, and that was the silled the properties of the same time and hanged some time they tramped back to camp. The Answer to the I. R. T. Injunction

The Answer to the I. R. T. Injunction

The Interborough Rapid Transit congany applied for an injunction against the striking motormen and switchmen so vicious in its open shop demands, and implication, that it involves the interests of the whole labor movement just as did the infamous court order, on which it is based, which allowed the sale of the homes of heartifying bandary batters to satisfy the avaricious corporation they were fighting.

The atotrney for the I. R. T. has even stated to newspapermentat the company is considering ways and means of instituting precedings against the strikes in the criminal courts.

If there were not signs that the strike of the I. R. T. workers is only a symptom of, the deep discontent of large numbers of their fellow workers with the company "brutherhood," if the strike had coerared in some small town instead of the largest city in the country, if it did not affect a basic industry, the action of the company in trying to improverish unrely the workers who had the storage to strike, still should be enough to attract the sympathetic attention and support of American Federation of Labor officials.

There is evidently a good chance to build a powerful union on an support of American Federation of Labor officials.

There is evidently a good chance to build a powerful union on the I. R. T., as found that they have the conrage to lead such an organization in what will be presserily, lecause of the power and arregance of the I. R. T., a long some particular that unless the Amaleumated Association of Street Werners and the property of the propert

We repeat that unless the Amalgamated Association of Street and Electric Ruilway Kimpleyes, and the executive conneil of the American Federathon of Labor make every effort to organize these men and give them all the nid possible in their fight they have failed in their days to the trade union movement. In their days to the trade union movement of the leaders of the independent union which has been formed during the stake have thewise the responsibility of leaving no avenue unexplored which will bring their union into the Amalgamated Association. This is expectable tolorius when they confront a corporation which hecitaites at nothing to keep its grip on the surders it exploits.

Detroit "Ford Worker" Goes Over Big

SIX THOUGAND copies of the fourth issue of the Ford Worker have stready been printed and most of these distributed; praparations are complete to print 10,000 more copies.

The Ford Worker is the organ of the shop nuclei of the Workers (Communist) Pathy of America in the Ford shops of Detroit and Hamtrameh, Mich.

The paper is being received by the workers of these two sweathings with the presents inthough and most favorable effects.

The Ford private pholes, as well as the official police of the Detroit capitalist class, attempted everal times to molect the "incomese" ecling this workers' paper, but apparently have found out that arrests and justs do not effect the spirit or the work of the Communist." Inexa-

The Proper Answer I.R.T.PLANS to the I. R. T.

THE DALTY WORKER said yesterday editorially that the injunction filed by James L. Quackenbush, general connect for the Interborough Rapid Transit company, was a challeage to the labor move and that the strike, which It is designed to crush, is of enough importance, even without the added menace of the injunction, "to attract the sympathetic attention and support of American Frederican of Labor officials."

The 1. R. T., thru its general connect, now makes a new threat couched in terms that should armuse every drop of lighting blood in the velus of every union man and woman in the United States. Quackechubush says:

Quackenbush says:

The last time something like this happened, we sent 750 men to jail. This time I'll give them a little variety. I propose in this matter to enforce every legal right the company has. This is not an idle gesture. . . We will lot the law take its course and if they misbehave the law with be enforced against them. IF THE SEW YORK SOME MEMSTROK SITS HEAD OF JULIUS LEW YORK SOME MEMSTROK THE ROUTE LEW YORK SOME MEMSTROK THE GOLDENCENCE.

FOR THEIR QUIESCENCE.

The "Annalgamated Union" Quackenlank refers to is the Amalgamated Association of Street and Electric Railway. Employes-affiliated with the American Federation of Labor, headed by William Malion, now in Urbiegon negotiating a new wage scale for the 20,000 workers on the surface and elecated three.

The I. R. T. has coulineated the wages due strikers, it inslegonght an injunction suit confluency in its demands, based on the infanouse Dambury-Labor proceedent. Quackenbash has stated that the I. R. T. injunction likewise will "not some percedents."

Now be makes the categorical statement that if the "Amalgamated I nion stricks its head up around New York some members will go to justice.

will go to jal. T., not satisfied with attempts to outlaw the strike-tived, amountees that it will outlaw an A. P. of L. union with 100,000 members, that its members will go to jall if they dare to try to or ganize the I. R. T. workers. Statements of this kind cannot be ignored by the labor move

ment.

"Regident Joseph Ryan of the Central Trades and Labor Coun-ity of New York is the only prominent union official to reply so far, to is quoted as follows:

This suit is a notice to labor that it must push its fight to limit the rights of the courts in industrial disputes. The right to a jury trial in a case like this ought to be and must be assured.

right to a jury trial in a case like this ought to be and must be assured.

This statement is all right as far as it goes, but it does not go are enough. It does not touch the heart of the issue which its. Are workers who try to organize, and unions which try to organize them. To be treated as individuals and organizations sominated in their purposes that any paid lackey of a corporation can blackgazed and threaten them in the public press, configurate their personal property and send them to jail without the labor movement officially and with its full power resisting to the unionst?

The way to reply to Quackenbush and his bosses is for the Amalgamated Association of Street and Electric Railway Employes, backed by all the forces the American Federation of Labor can muster, to begin an organization drive on the L. R. T., to enlist overy union man in New York who believes in the right, to assure every union ann in New York who believes in the right of workers to organize and is willing to fight for that right, to assure ever the full support of the labor movement, and then proceed to smask the company union and limit a read one.

This sort of a reply will not only send Quackenbush caurrying for cover but will teach an unforgettable lesson to the L. R. T. and then proceed to be an opportunity in New York to, check the injunction effective of the capitalists, to turn a menare into an asset for the rade union movement, to build a powerful union of city transportation workers.

This opportunity must not be allowed to pass.

But if to milliant answer in the form of renewal and continues efforts to argunize the 1, R. T. workers and extend the strike armade, it will be an admission that Quackenhush has correctly estimated the powers of resistance of the labor movement as almost nil

fortunately successful.

Rardly had the Furriers' settlement been made when 40,000 cloakmaters, members of the International Ladies Garment Workers' Union, are forced to strike.

Then 3,000 members of the Capmakers' Union begin a similar struggle with the bosses.

10,000 cleaners and dyers strike.
And now the Amalgamated Clothing Workers have made demands on the employers for wage increases and improved working conditions which it is probable they can obtain only by a strike.

Here are four different unions all working towards the same end in the same industry but divided by craft distinctions into separate carganizations, each with its separate treasury, its separate circle of officials but each dependent upon the support of the others for success.

If such an arrangement were proposed to a same person who had been prejudiced by existing institutions he would reject it a

htldish. There is tremendous rank and file support for analgamation in he needle trades industry. The series of wage disputes and strikes with its on the order of business of every union involved.

The present situation should lie utilized to drive home the need or smalgamation and to begin activity, in those unions where of ial opposition exists, for the calling of an analgamation conference.

King Albert's "Socialists"

The Belgian dictatorship could not have been established with out the endorsement of the social democrats. They voted for it and for King Albert as dictator.

Yandervelde, socialist minister in the Belgian cabinet, has been one of the most unscrupulous critics of the workers' and peasants government of the Union of Socialist Soviet Republics because it is the dictatorship of a class—the working class. He and his party, how ever, have given their public sanction to the dictatorship of the Bel gian capitalists—concealed somewhat before—but now personing openly in the person of a member of a royal family.

The socialist party of America has always been very fond of "Commide" Vanderveide. His writings have been circulated extensively by then and when he went to Itussia in 1921 to defend the counter-resolutionists of the secilarecolutionary party before a Soviet court, he was halfed as a hero.

We will be glad to peruse the American socialist party explanation of this method of waging the class struggle. Many times the

Belgian socialists have refused to enter a united front with the Con munists against the Belgian capitalists and they are now in a unite front with these same capitalisis against the Belgian working class.

One of the first acts of the dictateship is to be the handing over of the government-owned railways to private hands.

There have been many betrayals of the working class by the

There have been many betrayals of the working class by the socialist of a flagrant nature, such as the mass number of the German workers by the social-democrat Noske, the entry of the social-democrats into the bloody Zankov government of flugraria, the support of the war of the Polish and French capitalists upon the Societ Union by the Polish socialists, the oppression of the workers and peasants of India by MacDonald, the refusal to struggle against faceling by the Italian socialists, but the are of the Belgian socialist party synthesises all of these betrayals and shows to the working class that the sociality native is caused and shows to the working socialist policy is a capitalist policy, that it the working class into monarchial fascism it can, lead the working class into monarchial fascism fleves that this is the best way of keeping capitalism nive

Technics this tale does not adorn the moral, but it's a good story onyhow.

Eitzpatrick is no child, yet he is childish. He went into hys

teries has Sunday because one of the delegates, who happened to be a Communist, stated in answer to a question that he was unable to secure the presence of Pitzpatrick, Nockels, Olander, Oscar Nelson or other prominent conservative labor officials at a meeting called to or other prominent conservative labor officials at a meeting called to figlat the injunction that sent several girl members of the $1, L_{\rm e}$ G, $W_{\rm e}$ U, to jail. Therefore he had to invite labor leaders who were not attaid to fight the jujunction. One of them happened to be

not atraid to fight the injunction. One of them happened to be William Z. Poster.

While the girls were in jail the folleration officials did nothing to assist them, outside of appealing to theorem Len Santi, their pointed angel. Small did nothing, then Fitzpatrick kindly three the blane on the attenency general who is guanting to Small's job. In his anxiety to guard the interests of the conservative blow children and incidentally the employers, from the Communist wodves. Titzpatrick usually sheeveds in making an ass of him off. Last Small, principle, he graded the wrong end of the job when he attacked the girls who went to jail over the trijunction is made to be a surfaced the girls who went to jail over the trijunction is made and the surfaced the girls who went to jail over the trijunction is made and the surfaced in the ranks of the labor fadors would take the surfaced to the value of the labor fadors would place the surfaced of these and the surfaced in the ranks of the labor fadors would labor the surfaced of these women beft their little children in the care of others and served their sentences. and served their sentences

and served their sentences.

Of course, John Flitgatrick is not without compassion for the sufferings of others. But he finds thinself in a most unhappy posi-tion. The situation is not to this liking both he most sleep in the hed-he selected. He must either fight the employers or the progressives has elected to fight the progressives.

Pitzpatrick once stated that the Communists are elever enough

Fitzpatrick once stated that the Communists are clever enough to champion issues that are of interest to the working class. Quite true, And that is the unit reason why Mr. Fitzpatrick will too be able to carry out his ultimatum delivered in the heat of anger lass Smalay, 'John said he would no give delegates, who were able Com-munists, the thore mill they proved they were not Communists. If Fitzpatrick got about of the Communist in probling issues that are of interest to the workers, he would have no trouble with them. But then he would be so much like a Communist that the old Skinny Madden gang might rome to life and make life unserable for him.

West Virginia Miners Again in Battle

The uncomparable coal diggers of West Virginia have again gaised their lattle dags against the operators who have succeeded after years of struggle in wrecking the United Mine Workers of

anised their lattle dags against the operators who have succeeded after years of struggle in waveking the United Mine Workers of America in that state.

West Virgithie's one of the most famous theaters of war in the glerious history of the coal miners' union. It is here that the coal magnates base delivered their heaviest bloss. It is here that the univers have written the most splendid chapters in the steay of a struggle against underrathe resultitions.

The coal uniners of West Virginia not only had to fight against the chaptors, their games and their courts, but they were also under the landleap of having an international outsidendom which systematically substaged their crots that destroyed the solidarity of the district organization. Instead of flighting the operators, Lewis and three mounts and their courts are the solidarity of the district organization. Instead of flighting the operators, Lewis and three wines and off-med with them. For preferred to have their text under the basses table rather that on the pieter line conducting a ware against the progressive elements in the union rather than against the union smoking emplore more interested in combucting to all indications the present strike is a mass movement part he part of the miners in the Pairmont district, laving for fixian the organization of the studion miners in that year of the study back can produce victories. A victory in West Virginia would be a Auron call to the miners in every part of coal unioning section, of the duted States to reason the struggle to organize the unions of the duted States to reason the struggle to organize the unions.

I don't need to point to you; that my one idea is to buy quick and quiet, so people won't have; time to decide there's a boon on. You get me?"

"Yea," said Mr. Hardacre. "But I'm not sure how quickly," it can be done; this is a pretty small place, there's lots of talk, and it takes time to put through a deal."

"It won't take no time at all if you jist handle it my way and use good sense. You don't mention me, and do the buyfur or an unknown client, and you bry options for reash—that means, if the people are hereabouts, you close the reads right off."

"Igot a little change in my pocket," said Dad, "and I brought a cashier's check for three thousand, that I can turn into cash in the mornin'. You see, Mr. Hardacre, I happen to be Jist crazy about quall shootin, and I had the idea that it I found plenty of quall, I'd get a little land to shoot over. But get this clear, I can shoot quall on one hill Jist as well as on the next—and don't let nobody mistake me for a quall."

Dad took out of his card-case a letter from the president of a big bank in Angel City, advising whomever it might concern that Mr. James Ross, was a man of large resources and the highest integrity. Dad had two such letters, as Bunny knew—one in the name of J. Arnold Ross; the former was the one he used when he bought off lands, and no one had ever yet got onto his identity in time!

Dad's proposition was this: I he would make a contract with Mr. Hardacre, whereby Mr. Hardacre was authorized to buy ten-day options upon a long list of tracts, of specified acreage and at specified prices, paying five per cent inpos the purchase-price for each option, and Dad agraying five per cent inpos the purchase-price for each option, and Dad agraying five per cent inpos the purchase-price for each option, and Dad agray Mr. Hardacre was authorized an all purchases. Mr. Hardacre, torn between anxiety and acquisitiveness, finally said he guessed he'd take a chance on it, and if Dad threw him down, it would be easy for him to go into bank-rupty? He sat at his rusty typewriter and made two copies of the agreement, with a long list of tracts that were to cost Dad something over sixty thousand dollars. They read that over twice, and Dad signed it, and Mr. Hardacre signed it with a rather shaky hand, and Dad said fine, and counted out ten one hundred dollar bills out he deek, and suff or Mr. Hardacre taked it with a rather shaky hand, and Dad said fine, and counted out ten one hundred dollar bills out he deek, and suff or Mr. Hardacre taked it with a rather shaky hand, and Dad said fine, and counted out ten one hundred dollar bills out he deek, and suff or Mr. Hardacre taked it with a rather shaky hand, and Dad said fine, and counted out ten one hundred dollar bills out he deek, and suff or Mr. Hardacre taked it with a rather shaky hand, and Dad said fine, and count

What About It, Mr. Green?

The attack by the executive council of the American Federatio of Labor upon the strike of the underpaid textile workers in Passaic has had repercussions in many quarters. The statement of the executive council has been considered, and rightly so, an invitation to the textile barons to do their worst and an assurance that no matter what new atrocities they and their private detective agencies may invent for and inflict upon the struggling men, women and children of Pus saic, the executive council of the A. F. of L. will look on, remain silent or openly approve.

We have stated in these columns from time to time that certain sections of the middle class are more open in their hostility to big capital, as represented by the textile industry, for instance, than are the agents of imperialism in official positions in the ranks of or

FELIX DZERJHINSKY, CHAIRMAN OF SOVIET ECONOMIC COUNCIL, DIES IS OBJECT OF

MOSCOW, U. S. S. R., July 21.—The workers and peasants of the Union of Soviet Republics are mourning today for one of their most revered leaders, Felix E. Dzerjhinsky, who died here suddenly yesterday of heart disease. Comrade Dzerjhinsky was the chairman of the Supreme Economic Council, one of the most important posts in the Soviet government. Dzerjhinsky's death is attributed to his trieless application to his work from the time of his participation in the 1917 revolution to his present responsible position.

tion to his present responsible position.

He was formerly head of the Cheka and is credited with having done admirable work in suppressing counter-revolutionary intrigue and exposing foreign plots against the revolution. The soviet leader's body lies' in state in the Hall of the Unions, where Lenin reposed before his burial, and where thou-

sands of workers are gathering to view his remains. Dzerjhinsk will be given an impressive funeral tomorrow.

Pilsudski's British Bred Madness

War always has been the method of Bonapartist dictators for rallying the nation on which they have imposed their rule. Pilsudski

appears to be no exception.

His government, based on the army, and without any policy ex cept that of holding power at all costs, is the langhing stock of the world. He has alienated the lower middle class and the skilled workers who support the Polish socialist party, his inability to completely superpose the workers and peasants has cost him the confidence of the big landholders and capitalists. Even American backers, willing because of their huge stores of gold to gamble when twenty to fifty per cent in interest returns are in sight, are not

twenty to fifty per cent in interest returns are in sight, are not auxions to take a chance in Dodand under present conditions.

Dolish industry is in a state of collapse and mass nurrest is growing at a rapid cale.

Plistodski is making war talk. For war against Soviet Russia the can probably get support of a kind from Great Britain. He might get if from France if France did not have troubles of her own which make the presentin of the Syrian war on a major scale impossible. The runors of plots and counter plots along the Saviet and Lithanian froatier are preparations for a military adherentire which may or may not uniterialize. Army leaves have been cancelled and a tense atmosphere created. atmosphere created.

tense atmosphere created.

Tilistabiski and Poland alone are no menace to the Soviet Union, but backed by Great Britain a Polish offensive would be able to torce Soviet Russia to alumnon a considerable part of the reconstruction vork to struch it. The British imperialist strategy, designed to weaken Soviet Russia as much as possible, would be glad to back such an enterprise. It would be a desperate returne, bringing severe repercussions at home but Great Britain, like Poland, is in a descerate situation. severe repercussions desperate situation

in a desperate situation. It gives without saying that a Pilandski-litritish war on the Soviet Prino would not be successful. The result would be that Poland vould be smashed between Russia and Germany, the eastern sections becoming autonomous Soriet republies, the western either following their example or becoming Herman provinces again. But needs must when the devil drives and the paramic Pilandski would believe in the possibility of victory in such an advenure until the died of the layoutest of his own troops.

The world's working class should exert pressure upon Great Brainin to prevent the tory overnment giving financial approve the firming British miners, to feed and clothe the miners and their families until they win.

Borah Blowing Bubbles

Senator William E. Borah, the best Imged mannler of the upper that congressional house, delivered a speech hat Sinday in Augusta. Why There Is No Gary Investigation

SECRETARY OF LABOR James J. Davis, who boasts that he was once a "puddler" in the steel mills, this being before he found an easy way to fame and furtune in steel trust politics, is showing very slight signs of destring to investigate the Gary disaster in which 14 workers are known to have been killed and

showing very slight signs of desiring to investigate the Gary disaster is which 14 workers are known to have been killed and more than 40 injured.

The reluctance of the secretary of labor to do anything to embarass Elbert II. Gary and the steel trust can be ascribed to the close relations which the inonrable secretary maintains with the equally honorable head of the steel trust. The relationship is undoubtedly that of maşter and man, the honorable secretary with his old-world admiration for this relationship having put into writing his humble sentiments of love and respect for the great and good Gary who allows thorsauds of men to work for his company providing they do not belong to a union and keep their mouths shut about such annoying occurrences as the recent Gary disaster.

Secretary of Labor Davis, on March 9, wrote to the "Honorable II. Gary" a letter which we reproduced in The DAIL's WORKER for July 8.

The opening paragraph of the letter is as follows:

The opening paragraph of the reter in an reliable. Dear Judge Gary: I have just been going over the records of the United States Steel Corperation in the metter of secident prevention and safety work. The record is such a remarkable one that I cannot refrain from tailing you how exceedingly gratifying it is to me or from complimenting you upon a really wonderful achievement.

The first sentence of the fourth paragraph reads as follows:
What aspecially please mo is your reported statement that the
United States Steel Corporation has found that secident provention and
safety work result pays from a dollar-and-ents point of view.

The last paragraph reads as follows:

Once more, I wish to compliment you on this splendid record, and sesure you of my highest regards and setoem.

to searce you of my highest regards and seizem, who we offer the above as evidence showing why the secretary of labor, in spite of the fact that a half-doen senators and congressmen have urged an hivestigation, has not taken any action in the matter.

Now let us come a little closer to home:

Chairman Bynum of the indiana industrial Commission was machination last week attending the sessions of the National Industrial Company of Laboratory of Lab

his speech.
Interviewed by the Federated Press correspondent relative to the investigation of the Gary disaster Chairman Bynum spok

his:

They are such a fine concorn that I did not want to trouble them now, when the inside of the plant is all blown out, but when Super-instandent Glesson has completed his investigation I shall look into it, and shall make a report.

and shall make a report.

Chalrman Bynum of the Indiana Industrial Commission should go far in the service of the steel trust. Ilis fine regard for the feelings of the steel trust and its officials is matched only by his complete disregard for the workers who were killed and injured in the explosion. Generally the steel of the workers who were killed and injured in the explosion. The work of the trust of the steel of the control of the steel of the workers who were killed and injured in the explosion.

All be will have to do it so sign on the dotted lips.

The London Daily Mail Delegation and A. F. of L. Officialdom.

The London Daily Mail, aposle of all that is anti-trade mion and anti-working class in tireal Britain, the paper that was stopped by the perinting trades at the beginning of the description of the trade of the state of the control of the American Prolection of Labor to Interfer its campaign against the British labor movement. The Daily Mail sent a delegation of the American Prolection of the Lindot States to stung "industrial conditions." The real purpose of the enterprise was to make propagated in British labor movement, and the anti-trade of the speed proposed the enterprise was to make propagated in British for the speed presents of the speed proposed in the speed proposed in the collective boson as soon as the delegation announced that it stood four square against "bloke-toin in Britain." Here was a common lood and as the excentive rouncit, responsible head of the American labor annocement, wind and dilusel with the tooks of British labor's worst consider.

All of this time the Daily Mail was denouncing the minera, the British labor autions and everytody and everything which was not part and pared of the imperials machine.

The Bally Mail delegation set up the most friendly relations with the ignores sheep bases for the Christish and general of the American labor.

It is not the executive of the Linted States and its report-vectority published in England, price considered of American labor.

The state of the state of the statement repudiating all connection with the Daily Mail to failure to inform the labor movement of the exact character of the delegation.

This is not necessary to compatin it housest and intelligent workers conclude that it knew what connection the delegation with deviation and the little worker connection the delegation with their program.

The whole affair is designed the statement repudiating all connection to delegation and quick with their program.

their program.

The whole affair is desgraceful, showing as it does either an alysmal ignorance of the British labor movement or something far

anymat (guovaners) increasing the executive council of the American Federation, which has alided and abetted an international plot against British faltor when the miners are fighting for the life of their union, φ say for itself.

The Old Lady of Amsterdam

The press service of the International Federation of Trade Unions recently published a brief review of trade union develop-ments in Soviet Russia. The fossilized burstierats of the L. F. T. L. Jound much consolation in the frank speech delivered by promi-nent Russian trade union leaders on the weaknesses of the organ izations.

actions. The Amsterdam leaders profess to see in these criticisms a rowing dissatisfaction with "their subordination to the Com-quisit state power." the low a warker could speak thus plainly in a "country which is under the domination of the cent Bodsleviks a mystery to anybody who mentally feeds at the Amsterdam pola

is a injectory to anylody who mentally feeds at the Amsterdam pulticity trough.

What the Amsterdam fogics failed to admit was that those
criticisms were made by prominent backets of the Russian Commonist Party, who are also members of the unions. The Pommunist
Darty has conducted an increase the expacity of the workers for self-government,
Russian trade union beloves are constantly urged by the Communst Tays to make war on bureameracy and the membership is being
advanced in the belief that the raising of the enthrula bevel of the
morses will prove the best bulwark against bureameracy. This policy is quite the optosite of that of the 1-P. T. L. l. leaders who expel
gravity and the answer to the searned mongening of the 1.P. T. T. is
the phenomenal growth of the Russian trade unions from a little
ever a million before the war to vere eight millions today. The
task of training this tremendous number of workers in the art of
managing the unions is a difficult one, but it will be accomplished
by the methods of self-criticism and frank speech which are total
atmospers to the leaders of the 1.P. T. T. E.

A man can eat no more than his stomach will hold. Nor wear at any time more than bil fleth will stand. Also it is impeable for him to ride in two automobiles at once. Or to deep in more than one bed, in one roam, in one house. Or to be in two places at the same time.

Yet blg, fat men corner a million meals
Possess unto themselves a dozen autos.

A hundred men are trying to sieep on park benches tonight.

A thousand men are wriggling bare toes thru decrept shoes on bare pave.

Women and children are beggling on the streets for a bite to eat.

Out in Kanaas, California, Washington, the sheriffs are raiding the hobo
junglea and giving homeless men helt for being homeless. Men are jostling each other in bread lines for a crust of bread and a bowl of dishwater.

It is, of course, due to the superior Torce of capitalists and the lack of Boi sheviks!

A Dawes Plan for France?

Judging from Washington news dispatches, apparently in spired—if marthing inspiring our come from a capitalist source—the international leaking interests, dominated by Wall Street, feel that the time to slap a Dawes plan on France is not far distant. The return of Poincare to power, even but in any better the workers have these to excluding the manufacture of the workers.

The return of Poincare to power, even but in may be temporary, has raised high hopes in the breasts of the lumeful overloods of the worker.

Poincare does not mouth any radicel non-sees alout a levy en capital as a method of solving the financial crisis. His sold time will be survive, bits first appearance before the chamber—the may essay a minor Mussodiar Fole in France. There is no doubt that the House of Morgan will welcome his comeback. Morgan saved his political neck once before with a million dollar lost, just has saved Mussodian to the chars that followed when Bentol had the socialist Mateotti murdered.

In all pedabidity wall Street will soon step in and stabilize the frame. The bunders cannot altred to allow things to go completely to sunsh in France. The shadow of the powerful Soviet Lindon looms omitionally over the intrigues of different linguistics and mutual jealousies they prefer to crawl to the molech of Wall Street working classes.

Well, old Mr. Watkins invited them cordially to come in; and Saide and Meelle gave up their chairs and sat on a box or someting in increment. We think home, and in first thing that Dampy, sense of poverty. It was bare boards inside, the same as out; there was a big, unpainted table, and six unpainted chairs, a few slielves with crockery, a few pans hangling on the wall, and a stove that rested on a stone where one leg was broken. That was everything, literally everything—save for a feeble kerosene tange, which enabled you to see the rest. There were two other rooms to the cable, one for the husband and wife, and the other rooms to the cable, one for the husband and wife, and the other rooms to the cable, one for the husband and wife, and the other rooms to the cable, one for the husband and wife, and the other rooms to the cable, one for the husband and wife, and the other rooms to the cable, one for the husband and wife, and the other rooms to the cable, one for the husband and wife of the back of the house was a shed with two hunks against the wall, the top sheep that had strayed.

Ell was now eighteen, and had attained the full stature of a man; also his voice was that of a man, except that now and then it cracked and went up in a way that would have been roomisal, if anybody that listened to Ell ever had a sense of fun. Just now he was telling his parents and wondering sisters have the Holy Spirit had blessed him again, the shivers had selected him, and old sirs' Justice had been instantly relieved of her pains. Mr. Wate was the same that the control of the paint when the world the heart telling his parents and wondering risers him the Holy Spirit had blessed him again, the shivers had selected him, and old sirs' Justice, that was true, possibly more rire than they knew; he asked, had Mr. Watkins ever thought of the possibility that the Lord might send a new revealation into the world? And instantly you could see the family sit up, and fix their eyes upon Dad, the whole Six of them, as righd as so many stat

we are subsidized by the dimes and nickels of the working dars. Sometimes they only give us pennions.

The Trainne is subsidiated by the millions of dollars spent yearly by manufacturing, commercial and transportation interests. The assume is true of all other rapidatils papers.

Whenever those interests have a stringle with their employees, the sheets that live on recurne from their advertisements naturally take their side against the workers. When an accident occurs in the large Ubicage department stores, the dailies hardly ever mention in in their edinums. It might hart hosiness.

The Tribums suggests that the senate committee investigating may be appropriately expenditures in Hiniois, should probe into charges that newspapers are subsidiately so one of the other side of the president of the press has the pressure of the press that the senates of the press of light wine and here. The Trib thinks it is only fair to the press that those charges should be included within the scope of the shish quar. All of which is the bunk.

What the Tribune wants is publicity and increased circulation. But does not have to accept britise from the drys and the boutleggers its advertisers. The advertisers pay rates in proportion to the circulation of the advertising medium. Therefore a paper, that lites on such recentue will use any means to jack up its circulation. The Tribune flags prohibition because it cutres to a territory that is more set than dry; it used columns of space relling about the Encharistic congress because the catholic church is a powerful political organization and abox well represented in business life. Workers (Communist) Party

Back to the Party

By C. E. RUTHENBERG
General Secretary, Workers (Communist) Party,

General Socretary, Workers (Communist) Party, and Socretary (Workers (Communist) Party has been recreased and the second of the party the solution of the party the solution of the party the shop and street nucleil.

This reorganization of the party was assential in order that the party sets blink contact with the workers in the factories who must be won for the Genmunist movement. The results of the reorganization have already shown themselvas in greater activity of the party in relation to the workers actinguist in many excitons of the reorganization to the workers actinguist in many excitons of the reorganization of the workers actinguist in many excitons of the reorganization of the workers and support to their everyday fight while at the semetime carrying on its ampaigns to win the workers for the political attraggiatance and support the capitalist government.

The street nuclei which have replaced the territorial and language and the seme effective organization of the mobilization of the party will be a seminated and the regulations of their language group, has intensified the work-in the organizations of their language group, has intensified the work-in the organizations.

The party is making its strength more effective thrus the reorganization.

The party is making its strength more criterive that in a reorganization. In the process of rearganation, however, old the number of members of the party lest contact with the party. They have not affiliated with the always and street nuclei.

These formar members of the party joined the party because they supported Communist principles, the desire to participate in the organized struggle of the Communist Party in this country.

All the reasons which implicit define the become members of the party axist today. If they were Communists, and the fact that thay joined the party showed that they desired to be Communists and work for the Communist movement, their joined to be Communist and work rownerment, the Workers (Communist) Party, the consideration of the communist movement, the Workers (Communist) Party, the contact with the party because of conditions arising in the precess of reorganizations are urged to immediately take stops to again. SUMMING UP THE CAMPAIGN

A total of 282,895 points were secured in the campaign representing a total of 2,829 YEARLY SUBS altho many more shorterm subs were sent.

1,022 books of RED CARTOONS were shipped as premium to workers securing 100 points.

93 busts of LENIN, the work of the noted young proletaris ptor, G. Piccoli, of Milwankee, were shipped to workers securir 500 points or better.

DISTRICTS
DISTRICT S (Chicago), home city of The DAILY WORKER, should have been a leader in the campaign. Bigger and with a larger labor movement than DISTRICT 7 (belorid) they only got a few more points and reached only about half the quota of District 7.

DISTRICT 5 (Pittsburgh) and DISTRICT 6 (Cleveland) worked under similar rouditions, yet District 5 did almost TWICE as under similar rou-well as District 6.

well as District 6.
DISTRICT 2. (New York) could have had TWO candidates to Mos-con if they gut only 90 mere yearly subs.
DISTRICT 3 (Minnesota) did not have a city going over 26 per-cent and make the poorest showing in the country.

CITIES

LOS ANGELES, Cal., got 25600 points, San Francisco got 3,400 points. These cities are about equal in size and labor movement. Draw your own conclusions.

EAST PITTSBURGH, Pa. (John Kasper) scored more points than the whole city of Coveland, Toleid, Buffalo, Kausac City, St. Louis, Milvanice, St. Paul and even PHILADELPHIA?

DETROIT, Mich., made a very good showing getting over 20,000 points, That's keeping up the old tradition of always being one of the best PAHAY WORKER cities in the country.

NEW YORK, N. V., did as well in percentage as Detroit. But with the hig labor movement they have their showing is "not so good."

CHI CAU III., gral less points than hetroit, reaching only 21 per chart of their quota. This unusually near showing is the reason the district gets no candidate to Musecu.

NEFFS and CINCINATI. Ohio, with 56 and 56 per cent held the district up to where it landed.

PORTLAND and SEATTLE with 33 and 22 per cent showed poorly.

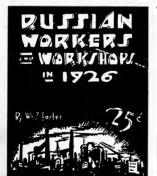

ELIZABETH. N. J., and STAMPOUD. Cound, did a good job.

ST. PAUL, Minn., the highest city in the poorest district, made u very good effort and if others did as well there would have been a different story to tell.

Well, old Mr. Watkins invited them cordially to come in; and Salic and Meelie gave up their chairs and sat on a box or something in a corner of the room. It was the first time that Bunny had been inside, the Watkins' home, and it gave him a shuddering sense of poverty. It was bare boards inside, the same as out; there was a big, unpainted table, and six unpainted chairs, a few shelves with crockery, a few pans hanging on the wall, and a stove that rested on a stone where one leg was broken. That was everything, literally everything—save for a feeble kerosene tamp, which enabled you to see the rest. There were two other rooms to the cable, one for the invisand and wife, and the other rooms to the cable, one for the invisand and wife, and the other rooms to the cable, one for the invisand and wife, and the other rooms to the save like the same that the wall, the other variant, a reminier of the sheep that had strayed.

What the Tribune warms to publicity and increased circulation.

It does not have to accept brites from the drys and the bootleggers on one side or from the west on the other. It get its satisfay from the increased circulation of the advertisers on the other. It get is the satisfay from the circulation of the advertisers pay rates in proportion to the circulation of the advertisers medium. Therefore a paper, that its consider revenue will use any means to jack up the circulation. The Tribune flags prohibition because it caters to a territory that is more wet than dry; it used columns of space telling about the Eucharistic congress because the cathout curred is a powerful political organization and also well represented in business life. This policy brings both circulation and advertising revenue.

One of the description of the description of the circulation of the circulation and advertising revenue.

WHAT HAS GONE REFORE

Dad explained: there had been two revolutions so far, to be found in the old and the new features. The fact that the Holy Spirit was preparing another? For a long time the followers of the True Word had awalted this fulfillment; the promise was in the Book, for anyone to read. This New Dispensation would supersede the others, and naturally it had got to be different from the others, and that the followers of the other shades and the state of the true Word had awalted this fulfillment; the promise was in the Book, for anyone to read. This New Dispensation would supersed the others, and naturally it had got to be different from the others, and that the followers of the old measurements of the true that the true that the second of the true word was to be revealed through the minds of nen, and would be a message of freedom; the Holy Spirit wanted us to seek boldy, and not be a faried and presently ont of the seeking of many minds the Truth would come—perhaps from some one who had been despised and rejected, that would become the corner stone of the new temple. Dad said all this with the deepest may be a supersection of the new temple. The said all this with the deepest may preacher?

So it seemed to the Warkins family also. The old mandrank in every word, and hissated that Dad should reveal to them all he knew. And Dad told them that they had one son, whose words had been reported to had, and seemed to him to son, and land been struck by his appearance, for he isoked ping liked and the state of the state of the seemed to the son and land been struck by his appearance, for he beaved of the son and land been struck by his appearance, for he beaved of this message of freedom, to which they were charged to listen, was their elected son, I and, whom they mistakenly had driven from among them.

was their eldest son, Paul, whom they mistakenly had driven; from among them.

Well, you should have seen the sensation in that family!. Did Mr. Watkins sat with his jaw dropped down, as thander-struck as it Dad had spronted a pair of angel's wings beforel his eyes. Mrs. Watkins film face were a look of inter-rapture, and her two stringy lands were classed together in front of her chair and onto her knees. Everyhody seemed to he pleased but, one, and that was Ell, he was glaring at Dad, and suddenly he sprang from this chair, his face we more due to the decided in the signal, and the signal of the

"It say evan he show the signs?" Has he fooder the stock." Has he casted out devices. Do he have rise up and walk? Du the dying take up their beds? Tell me (tat.) Tell me."

Well, sir, it floored Dat, for Ell was the last person in the room from whom he would have expected an outslangth. Dat drought of Ell as a gawky farm yokel, who came, with ne socks on, and pants that did not reach his shoe-tops, to bring the milk and take away the dirty dishes; but here was Ell, transformed; into a prophet of the Lord, and blazing, after a fashion not unsknown to prophets, with a white flame of jealons. Echoes of the British General Strike

Echoes of the British General Strike

An onge of action is worth a ton of declarations.

The activity of the British Communists during the general strike has convinced the Lianelly divisional labor party that they have proved by their randuct as well as by words that their part in the general labor movement is a constructive one and not destructive as the reactionaries represent it.

On the agenda for the annual meeting of the above section of the British labor party was a recommendation from the eventual communities that the affiliation of the Communist Party be refused and that the Lianelly party adhere to the Everpool decision, larring the Communists.

Between the time the agenda was made up and the meeting was held the British strike had taken place and when the mening the communists.

Senator Borah is not the first man to get into trouble because of a healthy pair of Imags. It delivered a speech for the antisational begane in theorgia recently. Now, the Pennsylvania democrats are appealing to him to enter the sext and stump for William B. Wilson, dry and democrat. But Wilson is also for the world court and the begane of autions. So what can Borah do unless he plays the role of a "third let loose?"

Another individual who got into trouble because of his housst antipathy to booze and shade funds is the editor of the Loremotive Engineer's Jone, and Roos, ing that the gauthenan was an operator of seah mines. But then Warren S. Stone, late healt of the Engineer's Union, was manage of a few wals mines. So perhaps that is not guch a serious matter. What some reformers seem to worry most about are not issues that affect the cornel heef and sanerkrant of the workers, but vagar-valedasts' like the furnishing of dig heaves to the natives of Central Africa or christianity to the Utilinese.

STATEMENT OF THE CENTRAL COMMITTEE OF THE WORKERS (COMMUNIST) PARTY.

THE Central Executive Committee of the Workers (Communist) Party, having considered the decisions of the plenum of the Central Committee of the All-Union Communist Party, makes the following declaration:

The Fourtpenth Congress of our brother party, the All-Union Communist Party, considered the problems of Founmunist representative to the Union of Socialist Saviet Republics with a Leninist spirit and with Leninist thoroness and decided on a correct policy for the development of a socialist conomic agatem in the Soviet Union. The opposition, errevisitingly detected at this congress, incerty volved an anwholeosome pessialism arising out of its loss of confidence in the revolutionary packeverence, remarky and optimism of the industrial problemial. This pressmines was expressed in un-Leninist and leftia phrases committee in the communist International, and our American Party famong them, had boped that in spite of the mistakes, the opposition, and its leader, Comrande Zimoviev, second at least preserve the indispensable Bolshwist discipline and accept the judgment of the party, and apply itself to the state of executing the decisions of the fourteenth congress of the All-Union Communist Party.

This hope was not well founded. The opposition proceeded to organize against the Central Committee and against the decisions of the fourteenth congress. The urgunization of a faction within a Communist Party, at all times a dangerous act, becomes the centre of hope for all enembs of the productary.

To preserve the unity of the All Union Communist Party has led the productarial to govern and where discension in the party becomes the centre of hope for all enembs of the productary.

To preserve the unity of the All Union Communist Party has led the productarial to the unhampered execution of the policies of the part for the party and to secure the unhampered execution of the policies of the party.

To preserve the unity of the All Union Communist Party and To preserve the unity of the AIJ from Communist farty and to secure the unbianquered execution of the pairty, the Central Committee thra its plenary session, was forced to take strong disciplinary measures. The removal of Contrade Zinoviev from the Follorican and the exclusion of the candidate member, Commade Ladscrick from the Central Committee, discided upon the plenum of the Central Committee of the All-Union cided upon the plenium of the Central Committee of the All-Tuion Communits Party, was fully justified by their breaches of dis-cipline. These measures were necessary to scener and cement the unity and recolutionary efficiency of our brother party, and to prevent the spreading of un-Leuhist theories within the par-ty; the measures taken will strengthen the Central Committee in its strengthe against the liquidation of Leninium by Trotskyrisn thru the oppositional alliance between Zinoviev and Trotskyrisn and, finally, they will strengthen the All-Tuion Commissional Party in its Leninist leadership of the Community International.

one, many, they will strengthen the All-Union Communist Party in its Leainist leadership of the Communist International. THE raphd distintegration of capitalism in Europe controuts our International with tremendous tasks. The unity and Leainist parity of the Communist International is the only guarantee for the predetariat, that these tasks will be met and guarantee for the predetariat, that these tasks will be met and citerty will be achieved. Filtration by the opposition within the All-Union Communist Party with left and right deviations alike, such as tribadus in Germany, Souvaine in France, at least an maprinciphed step suggested by factional aims, becamined these conditions an act endangering the very revolution itself. The measures taken by the plenum of the Central Continue of the All-Union Community Party of the Communist Party.

The Central Excentive Committee of the Workers (Communist Party).

THE Central Executive Committee of the Workers (Com minist) Party greets the Central Committee of the All-Union Communist Party in full solidarity with its measures against an opposition which threatened by its activities not only the unity but also the resolutionary achievements of the advance guard of the Russian and world predicariat.

Like the fellow reading a message from home, who did not know whether to laugh or to cry because of a blurred letter which could drawtically after the meaning of a word, we are at loss whether to gigdle or growl over the following comment on the organization of the Chicago Brug Clerks' Union that appeared in the official organ

gigab or growd over the following comment on the organization of the Unicago Brug Clerks' Union that appeared in the otherial organ of the Unicago Relail Druggists Association. Our suphisticated readers will probably say: "Some minor." and let it go at that:
"The of the most significant stands this board has taken is the one in regard to the drug clerk's muon. After numerous contreveness with the officers of the Uniong Drug Clerk's 1 mion, and after having received the promise of their officers to roofe with the C. R. H. A. on all questions of pulsey of the union, your board without a dissenting vote decinion in the drug money with them for the betterment of our and we as members of the C. R. D. A. A. A. who as the certaintation of others. Furthermore we pellow that much good will come from this step we have taken, provided the mion lives up to 1s promise and confers with the C. R. H. A. on all problems, so that an sputiable, adultion may be reached. The Urne Clerk' 1 nion realizes that they can accomplish little without the moral support of the C. R. H. A. and it is hardly postable that they will do anything to linear our disapproval. The C. R. H. A. should keep in close touch with the union, and I would recommend that from time to time we send a representative to their meetings to address them on subjects of pharmaceutical interest, salesmanship, win to defense the major for the contractive that it is another than the substitution of the contractive that a good clerk is more valuable than a poor one, and any money we spend in improving our clerks is well spent. The relack today realizes that if the wants to make his position more incrative that it is strongly up to him to do so. A proprieter of one of the clean stores has this slogun for his clerks, 'If you want more money get it from the center of from the boss."

Another Visit from Abroad

The federal government of Australia is sending to the United States a delegation of industrialities, "representing" employers and employers to investigate the reasons for the industrial prosperity of the United States. The government will pay all the expenses.

This delegation could very well save the time and money spen on the trip as well as the printers ink and white paper that will be rained by the written report of what they will surely learn. It is an Australian edition of the Daily Mail investigation which also represented "capital and labor" the the labor side of it was swarery that reem J. H. Thomas did not spossed it. As was expected the Daily Mail delegation report, attributed the prosperity of the United States in the letter feeling existing be twen employers and employers in this country. Superstitious Masses Incited by Clergy

Thousands of poor peasants and workers in Mexico are mads the victims of the most supersitious ballets and practices by the catholic church that has been spreading derkness in that land for saveral centuries. Above is shown a religious procession thru the streets of a Mexican city in which the participants are crawling sings on their kness. Mexicos hundred of thousands of decout worshippers are now being utilized in that right of the church to overthrow the authority of the anti-certical provisions of the constitution of the country. But there are more hundreds of thousands who have thrown off the yoke of ignorance and are engaging in the fight to break the power of the church.

Page Senator Borah!

We have another job worthy of the steel of the brass lunged sen-ator from Iddio.

In a recent issue of the Norlatk Journal and Guide, a Negro-pager published in Norlatk, Virginia—that state so justly famous for the elegancy of its fly white aristocracy and for being the hirth-place of Woodrow Wilson—acc lind two news items that should make people sit up and think.

Your time number 1. The last money accountly of Mantaland

prophe sit up and think.

News item turnber 1: The last general assembly of Virginia passed a law unking it unlawful for fraternal insurance companies with white officers to insure Negro members. Thousands of Negross in the state are insured in such companies and many of them have yet to learn that the policies that represent the nickels and dines they ioud fill afford are not worth a French frame. Than is the notile Nordie saved from contamination by the touch of a Negro hand, but we alter say the mobile Nordie would risk pollution many times over, for the sake of the Negro's eash.

times over, for the sake of the Negro's cash.

News item number 2: A Mrs. Blanche Brookins, referred, was taken from a Pullman train at Patalaka, Florida, incarreated in a fail for the night, and brought before a judge the following morning, who find the lady Sam and rosts with the alternative of six months' imprisonment. The fine and costs amounted to \$518.17. It was paid.

Who.

ing, who fined the Indy Som and rosts with the alternative of six multi-fine prisonment. The fine and costs amounted to \$518.17. It was prid.

What was the Indy's offense? Was she raught sterling a rule? Was she guilty of some improper action? Surely, the noble Nobule of Maythover amerstry will protest that the Anglo Saxon monephino of pistice would not tourch a human hair marightenady.

But listed normal protest that the Anglo Saxon monephino of pistice would not tourch a human hair marightenady.

But listed normal protest that the Anglo Saxon monephino and with having delated Florida's 1m Crow law which profulitis Negroes from riding on a Pullman train.

"Mrs. Brookins purchased Pullman reservations in New York, for a thru trip to Orlando, Plorida. At Jacksonville the conductor requested the lady to leave the car. She quite properly refused. The conductor them wired to the authorities at Pataloka who took action. When the judge inflicted the fine he said: "That adaptement be the maximum penuity or it wand be more."

According to the Vordsk Journal and Guide, a test case will be made of this incident. We hope so: And the Negro organizations that may take up the matter should not appeal to raid in the fight to Negro organizations only.

Every worker in the United States should feel that this is a matter of concern to him. The treatment accorded to Mrs. Brookins is only one incident in a long series of insits to the Negroes of the south. We admit that it is a lesser crime than the counties significant age majorished in the model-raid of the kirk is ken kind and the stronghold of the democrat party. What is actually taking place is something quite different to what the papers would have us believe.

I allow the present indications are misleading the international harders have decided that they cannot afford to allow France to wallow in the mind of financial clauss my honger, on the theory that a financially dirty France would smear the seeming of every after country she comes in contact with. Furthermore, the French capitalists have now been separated from most of their conceit and are in the proper mode to take whatever the international bankers in their generosity feel like hunding them.

Republican Politics Are Discussed Over Bier of Late Senator Cummins

By J. LOUIS ENGDAHL.

TWENTY-ONE United States sentral rates and the whole lows delegation is congress gathered about the bier of the late Senator Albert B. Cummies at Des Moines.

It was less a time for paying trihate to the death; mere a time to plan the future of rapublican politics.

Our prediction is that they will get him.

One of the first signa Indicating whether Brookhart has made his peace with the regulars will be his aclection to fill out Cummins' unexpired tarm, meaning that he will sit in at the December session of congress.

The use of the injunction in industrial disputes is one of the most valuable and effective weapons in the hands of the employers. It is used indiscriminately against radical and conservative. The employers are not so under noncernal with the publicable beliefs of a labor leader, during a strike, as they are with his willingness and ability to dight in a fashion that promises to win convessions for the workers at the expense of the hoss.

A New Treaty with Panama

The new treaty with Panama, recently "negotiated," to use the diplomatic phraseology which contains no hint of the influence of gunbants and marines, and whose chief feature is the arknowledge ment of the right of the l'nitred States to subordinate all of Panami to the canal and the canal zone, is doubtless the result of new articity on the part of the state department aroused by the avquisition by British interests of two large tractifs of land in close gravitatity to the canal.

These trusts are still to include practically all of the land suitable for tubber growing in Panama and in addition are so hearted as to provide must based of in the rapitable typesser, and the new treaty produced as to provide must based of in the rapitable typesser, and the new treaty produced and der whose regime the canal zone was grabbed. Since that ring der whose regime the canal zone was grabbed. Since that ring der whose regime the canal zone was grabbed. Since that ring der whose regime the canal zone was grabbed. Since that ring framam is become a pupper state, the most recent include in previous to the new treaty being the breaking of a rent strike by the armider of the finited States.

The severigity of Panama was first invaded by Russecrelt unstrategic bases they contain, and which are desired by Wall Street and its imperialist government.

The next treaty with Panama is only the lattest example of the steady drive to the south of American imperialism. It is also in indicative of the growing rivary between America and British im perialism.

A Letter to Some of Our Party Members

DEAR COMBAGE:—On May 15 the National Office sent to every party uncleid a supply of United Labor Ticket Assessment Stamps and a letter to collect this assessment. The letter pointed to the first that the cleation campaign this year offered. The letter pointed to the first that the cleation campaign this year offered independent political action on the basis of their class interests. It naked the party members to provide the funds for the preliminary work of putting united labor lickets or party lickets on the ballot by contributing fifty cents each trut the nassesment.

The members were told that the assessment was compulsory and was under the party constitution and that these members who did not pay it into be in good atlanding in the party.

SINCE THAT TIME TWO AND A HALF MONTHS HAVE ELAPSED AND IN THESE TWO AND A HALF MONTHS THE ASSESSMENT PAV-MENTS OF TWO THOUSAND NINE HUNDRED AND FORTY ONE MEM. BERS HAVE BEEN REMITTED TO THE NATIONAL OFFICE.

We ask you: Are you one of the members who have paid the assessment or ARE YOU ONE OF THE TEN THOUSAND WHO HAVE NOT?

Or-have you paid your assessment and has your secretary neglected to make the remittance to the National Office?

WE ASK YOU TO FINO OUT. LOOK IN YOUR DUES BOOK, IT WILL TELL YOU WHETHER YOU HAVE PAID. FINO OUT AT YOUR NEXT NUCLEIS MEETING WHETHER THE OTHER WEMBERS HAVE PAID AND WHITHER THE SECRETARY HAS REMITTED THE WORLY COLLECTED TO THE NATIONAL OFFICE.

Every party member should take an interest in making the party ap-paratus function efficiently.

THIS IS AN APPEAL TO THE MEMBERSHIP TO HELP MAKE IT DO SO BY SECURING A 100° , COLLECTION OF THE UNITED LABOR TICKET ASSESSMENT.

Fraternally yours, C. E. RUTHENBERG, General Secretary

Now Bunny had been taking a course in school which was called "rivies," and had learned all about how the government of his country was run. There had been ninny discussions in class, and among other things they had mentloned "corruption of public officials." Bunny—of course without any him that had ever had personal knowledge of such a thing—had asked the lady teacher about the possibility of a business main's paying a public official extra sums for his time and trenule in public matters; and the lady teacher had been shocked by such a suggestion, and had declared that it would be bribery without question. So now Bunny told Dad, and the latter explained. It was the difference hetween a theoretical and a practical view of a question. The lady-teacher had never had to drill an oil well, her business idin't depend on moving heavy materials over a sheep-trail; all she did was jist to sit in a room and use hitch-soundin' words, like "ideals" and "democracy" and "public sortice." That was the trouble with the siducation business, the people that taught, was people that never done things, and lad no real knowledge of the world. Now Bunny had been taking a course in school which was

people that never done things, and had no real knowledge of the world.

In this case it all came down to one question, did they want to full the Warkins tract or not. Of course they nlight walt ten years, illi in the routes of the country's development somebod less earning and did what bad was now admin-que iskids under the public authorities, and "greased" the skids. In a great many wasses the authorities, and "greased" the skids. In a great many under the public authorities, and "greased" the skids. In a great many masses the authorities, and "greased" the skids. In a great many masses the authorities was pray; in other was continued in the contain and indifference that a had caphined the difference between public and private business; in your wan business, you were boss, and you drove ahead and pushed things through; but when you rant into public authorities, you saw graft and waste and Inefficiency ill it made you sick. And yet there was fools a kays rooting for public ownership; people who called themselves Sociallats, and watted to turn everything over to the government to run, and when they had their way, you'd have to fill out a dozen application blanks and watte to action of a becard of officials before you could buy a loaf of bread.

Dad said that Bunny would get a practical course in civiles.

uon mans and await the action of a board of officials before you could buy a loaf of bread.

Did said that Hunny would get a practical course in circles, that we could take hack to his beacher; they wasn't going to get their road, jist by paying a tip to one apriort-grower. And sufferenough, they didn't! A couple of days later Dad got Mr. Carey on the phone and learned that he had interviewed the other board came up for re-decident this fail, and there had been a lock or grunbling over the waste of road finds, and thousand the board came up for re-decident this fail, and there had been a lock or grunbling over the waste of road finds, and showed he was the board came up for re-decident this fail, and there had been a lock of which was the properties of the locked next week, and meantine, if bad had any influence, it would be a good time for him to use it. Bad repeated this to Bunny, and explained he was supposed to call on the other board members and distribute some more cavelepes. "But I'll do it wholesale," said bad, "and I'll do it quick--before the Excelsor Pete crowd wake up to what's kappening. That's our only chance, I've an idea."

So Dad strolled into the office of Mr. Barliacre, the terms.

So Dad strolled into the office of Mr. Harlacre, the real So Dad strolled into the office of Mr. Hardacre, the real estate agent, and through the studes of a gold fud eigar he put to that knowing gentleman the problem of what people he. Mr. Hardacre, wundle call on, in case he wanted to get a road hull; In San Elldo county. Mr. Hardacre knuched and said that first he'd go to see Jake Coffey, and after that he'd go house and rest. Further questions elletted the fact that dake Coffey was a lay and feed dealer in the town of San Elldo, the county seat also, he was the Republican boss of the county. Bud said all right, thanks, and he and Burny were soon in the ear, and hended for San Elldo at Dad's customary speed. "Now son," said he, "you'll fin-ish you lesson in civies?"

Unions and Individual Terrorism

Unions and Individual Terrorism

We will shed no tears over the death of one Markotite, a contractor, unfair to the Metal and Machinery Movers' I mion, at what appears to be the hands of officials, members or agents of that union. But we can and will point out that these methods of deating and with postnices of the labor movement serve no good purpose, but on the contrary bring the utmost discretify on the trade naions, alternate when those very members of the working class the unions must depend upon for support and give the equitalists and their government an evens for browest attacks outlawing labor organizations.

Support of capitalist policial particles by trade union officials are bother areas and offers of such occurrences. By supporting capitalist party politicians who expursive element in the unions secure in mainty and by individually in a such practices the labor officials part themselves at the mery of the capitalists party politicians. The combination of some particles the labor officials part themselves at the mery of the capitalists party politicians. The combination of some particles of the part of both building trades bosses' and mions with sections of the underworld, has created a stimution in office large American cities which threatens the labor movement as well as effectively to the capitalists and the control of certain mions, an office large American cities which threatens the labor movement which destructions, the members have been deserved, comulacent.

When Bosses

Charges differing in degree but not in kind from that prevailing in differing a microan cities which threatens the luber movement with destruction.

The morale of the membership has been destroyed, complacent removement that the mountained has been substituted for the former facility against it, the unions in many instances have become little more that a base for a new kind of handiti and their political leaders.

There is the danger that a strong offensive by the bosses would find a desire that the moral of the danger that a strong offensive by the bosses would find a desire of the moral of the danger that a strong offensive by the bosses would find the danger that a strong offensive by the bosses would find the danger that a strong offensive by the bosses would find the danger that a strong offensive by the bosses would find the danger that a strong offensive by the bosses would find the danger that a strong offensive by the bosses would find the danger that a strong offensive by the bosses would find the danger that a strong offensive by the bosses would find the danger that a strong offensive by the bosses would find the danger that a strong offensive by the bosses would find the danger that a strong offensive by the bosses would find the danger that a strong offensive by the bosses would find the danger that a strong offensive by the bosses would find the danger that a strong offensive by the bosses would find the danger that a strong offensive by the bosses would find the danger that a strong offensive by the bosses would find the danger that a strong offensive by the bosses would find the danger that a strong offensive by the bosses would find the danger that a strong offensive by the bosses would find the danger than the danger that the danger than the danger than the danger than the danger than the danger than the danger than the danger than the danger than the danger than the danger than the danger than the danger than the danger than the danger than the danger than the danger than the danger than the

There is the danger than a strong measure by the bases which the unions without real mass support.

There is too much demand for labor to make such an offensive profitable just now but once employment begins to slacken seriously

prolitable just now tent one employment or gots to show a reconstitution will repeat itself.

Instead of executing employers the unions should begin to clean house and rid themselves of the gangster element which has fastened

home and fid themselves of the gaugster element which has fastened itself upon them.

But this can never be done in a three manner as long as the micro-officials can itselfer regardizations hand and foot to the parties of the basses against when they wage war on the job.

As for the reformers in the ranks of the bosses, who try to use such incidents as the killing of Markwitz to bewall the certuption of the labor minions and appeal to the "become section of labor," we can only say that the devent section of labor is beginning to under stand that these incidents are without real significance for the great majority of the members of labor mions except so far as they prove that there is little difference between bosses who support capitalist party politicisms and labor officials who do the same thing.

Their wars are intermedien wars, the building contractors who support the handles award are hirring the dregs of the Illinois underworld as gummen. As against the gummen of the hosses we are for the gumons of the unions, but we know at the same time that both sides unite against any movement of the area and the for the gumen of the party-lebth are against anything which will give the American labor movement a class relative terror invent a class relative terror invent a class relative terror invent a class relative terror. r and make it so powerful that individual terrorment a cuss mara er and man.
-m will become as obsolete as craft unionism.

Cowderry's Letter Was the Best -Part of Yesterday's Issue of The DAILY WORKER! Read It Again!

NOTE-This is the sixth article in a series reviewing the struggles of series reviewing the struggles to develop the DAILY WORKER that a mass organ. This series is written with the purpose of teaching and encouraging the readers of our Daily's to help develop its in the American working class. This stride, is a cumment on a letter written by P. B. Cowdery that appeared to yesterday's DAILY WORKER.

By J. LOUIS ENGDAM.

By J. LOUIS ENGDAIL.

If is no easy tank to develop our Communic slaily. The DAILY WININGR, itse a mass organ. It is no easier than to develop our workers (Communist Party into a mass Formunist) Party into a mass Formunist Party into a mass Formunist Party into a mass Formunist Party into a mass Formunist Party into a mass Formunist Party into a mass Formunist Party into a mass Formunist Party into a mass Formunist Party into a mass Formunist Party into a mass Formunist Party into Carlos Party

The DAILY WORKER is the kind of paper they ought to read, that it is of great value for them in their daily atrusgles. His method succeeded. He points out "Once they read it successively a few times we have them."

There is the mean however, who likes to ran as his job. When every subserver will out reme will mediately untarily, this type of builds that his "Daily" must be reblame, lie finds up fault in the reports with long draw the machine, casting gloss ever he goes.

Is War with Mexico Imminent?

Ambussador James Shefield is leaving Mexico City for the United States after handing Calles a note which reporters him will be the last from the American government on the petrolena question. This bitt has a deadly significance.

Of course, the U. S. diplomatic attaches in Mexico deny that there is any relation tetween Sheffield's action and the rebellion of the catholic church which is now in full wising in the southern

republic.

The problem of the proble

ith the powerful propagated machine of the catholic church go on a campaign for intervention and the oll barrons always to finance a counter recolation; will a government in Wesh subservient to big business and ready to the its hidding, is serious danger of war with Mexico. This would be wel-by the American maperialists who want to see a more plable in power south of the Rio Grande.

American workers are the only reliable friends in the States of the Mexicon people. They must now demonstrate foundable by making it known to the nower-state bein Wash-that the workers will not permit the hances, oil barrons and sphelices, it allimes with the cartholic church to cruch, the a people and return them to slavory under the black roly-an which they freed themselves.

Coddge administration must bear in no uncertain voice.

LONDON, Aug. 10.—The British real strike seemed further than ever front settlement today, when the executive of the Miners' Federation announced that the district conneglator voted to reject the ecclesiastics' proposals for settlement. The ecclesiastics' proposals provided for a compromise settlement, and had been favorably received by a delegate conference of the miners. The present vote shows the rank and file of the miners will not permit any compromise.

MOSCOW, U. S. S. R., August 10—The information broadcasted by the world capitalist and social-democratic press of Insurrections within the Union of Soviet Republics, of the arrests
and attempted assessinations of Soviet leaders, is pure invention.
The false news reports, which have been broadcasted the
Jast few days, have, however, an important political significance.
They are intended to draw public attention away from new
schemes of imperialist adventures on the part of the capitalist
powers.

personness or imperialist adventures on the part of the capitalist powers.

Peland, with the support of Great Britain, is engaged in anti-Lithuanian preparations, and Roumania is concentrating troops in Bessarabia. Thus the capitalist powers are preparing for a gave war, which they are seeking to hide under the screen of ridiculous and malicious news reports regarding non-existent uprisings within the Soviet Union.

All is quiet and peaceful within the Soviet Union and the workers and peasants verywhere, more energetically than ever, are proceeding with their tasks of reconstructing and building industry and agriculture, in which tremendous progress has already been made.

Quiet Comes to the Riga-Reval-Warsaw-**Bucharest Front**

After a week of intensive and Soviet propaganda, during which a now record for lying on an international scale has been set, the expitatists nowapapers, on their inside pages, are beginning to retract in whort peragraphs the categorical statements they made in several line sound its page stories.

The counter recording in the Soviet Union is off. If never hear, except in the pages of the capitalist press, but when the wisit is father to the thought, and when the thought is a wish for the destruction of the Soviet government, news writers are given a latitude which, if taken in other circumstances, would send them looking for a row lob.

Rival groups of Communists are striving for control of the Sociel government. This does not mean the open verolt, which has been runowed, but now is straight.

This is evidence enough that the Riga dispatches were ma out of whole cioth, the Tribuae correspondent being too modest to state that he was responsible for lifty per cent of them. The sam-can be said for the veracity of the dispatches from Reval, Warsaw

The offensive against the Soviet Union is not over one of the essents we bearn from it in its present stage is that what-ever occurrence in the interest utilative of the Soviet Union can be interpreted by the watchful advisers of world capitalism as a sign of weakness becomes the signal for a new attack on the workers'

and peasants' government.

These attacks are the lest proof of the falsen These attacks are the lest proof of the falseness of the con-tenties of the world capitalist press that the Soviet Princip is return-ing to capitalism instead of building a socialist comony. If the tensor ever true the ruling class would not waste so much energy attacking a government which was driving the workers and peas aut of Revela back into the family of capitalist nations.

British Government Now Starving Miners' Babes

NEW YORK, August 11—(FP)—No more milk for the bables of the British strikers! Starve them! That is the policy of British authorities, the latest cable received from the other side shows. The cable comes to Eilen Wilkinson, M. P., of the British relief delegation from Marion Phillips, head of the British Women's Committee for the minors. It reads:

LONDON.—Conditions here are worse. Clackmannon and South Lanark have stopped parish relief, school feeding and milk for babies. Villages are suffering gaunt starvation. Litchfield is pitful. The Pontypridd workhouse is full and relief has been reduced. The Bolton area of 22,000 miners is still without relief except from us. Every day the public authorities are withdrawing assistance from somewhere. The fund must be maintained. Good luck.

The Mexican people under the rule of Porfirio Diaz suffered all the etils we associate with the Middle Ages. The catholic church was the largest single hand boder, it like the other great landorshe, one of whom, Gurierred, had an estate so large that if took a raily any train forty-eight hours to cross it, had the power of life and death over the peous. Thes Mexican peasants were serfas, Since the overlirow of Porfirio Diaz ley a popular revolution, all political questions in Mexico, external and internal, have centered around the division of the land amough the Mexican peasants; 11 is sulightening to note, therefore, that the bental fendalistic regime? Diaz is the one which the spokesmen of the catholic church describe as in Golden Age of Precious.

The obtaction, referred to in the peragraph quoted above, obviously is what all the trouble in Mexico is about.

The obtaction, referred to in the peragraph quoted above, obviously is yearquand for the replacement of the Culies government by a more reactionary regime. Church Offensive in Washington

Intervention in Mexico is asked by the Knights of Columbus (the most powerful and nillitant of the muxillary organizations of the catholic church) on the part of the American government.

"The catholic church understands very well the full implications of such a request and it is therefore willing to precipitate a religious war between the United States and Mexico. It asks that the armed forces of the American government be placed at the disposal of the catholic church.

catholic church.

There is no question but that Wall Street is seeking an evenue for intervention but powerful as is its prepaganda agency in Mexico—the catholic church—the controversy has taken on too much of a religious character with the church playing the leading role to make intervention in behalf of the church a popular issue in America.

Some other excuse vil have to be found and President Cooling already has given a hint as to what will be considered adequate perconation by mentioning his maxiety over the "lives and properly of Americans in Mexico."

of Americans in Mexico."

The campaign of the catholic church and its agencies since the Bucharist Congress, both in the United States and Mexico, has been of the most outrageous character and it is surprising even in barkward America that it has not aroused more popular indignation.

James J. Plaherty, spakesman for the Knights of Columbus and head of the order who requested intervention of Secretary of State Kellogs, is nothing more or less than an American emissary of the vatican. He quid a visit to Rome last year, was knighted by the pope and his recent activity undoubtedly entitles him to receive the highest repud decorations.

and his recent activity undominedly entitles him to receive the numerical papal decorations.

The American people twe include in this classification all of that group commonly described as "the man in the street"; are not politically conscious. The majority of them vote the titeless of the demorat and republishen equivalists, they are affected of a their and to mannish, but we do not believe that they can be won for cathelicism.

Catholicism is foundaism (in the l'uited States is hidse its time and makes certain generosisms to empiralist industry and capitalist democracy) and in Mexico it still dreams of contal power.

We believe that the time is seen, a branch makes certain generosisms to empiralist industry and capitalist democracy and in Mexico it still dreams of contal power.

We believe that the time is seen, a branch on support of the sequention of church and state in the capital to stop the counter recoduling and the cathodic church against the right of the Mexicon and the counter of the contact power to enforce the constitution which strips the church of its power by dividing its long extense among the peasantry.

This is the craw of the question for the catholic church. Only by control of columnia institutions has on on its landed wealth and in perpetuate itself as a culer in Mexico. Its articler for the spirit and such of the Mexicon peasantry is in direct ratio to the extent of which the superstition of the peons can be used to protect the wealth and power of the church.

The Mexican labor movement and the Mexican government artrigin to force the church and of politics in Mexicon in the Parised Rates the auxiliary organizations of the valican engage in political demonstrations in support of the feedal Mexican church.

They should be told, especially by the labor movement, with which they interfere constantly and seek to dominate, that they are toget out of politics in the United States and stay out.

We Told You So!

Prophets are rarely honored in their own country or generation it so with us for the very good reason that we are a committee to see to it that our good works are not honored on the wrong

or one to see to 1 mar our good works are not nonzero on the woods gide of the grave.

Not lairer than two days ago we predicted that the capitalist gress would not case recording roballions in Saviet Russia because of much a little thing as positive proof that the political situation was mental in the Sowiet Union was published in the capitalist press. The proof was not produced by radical sources. It was the result of an investigation by the Associated Press, which cannot be charged with Communist contamination.

Among the papers that published the refutation of fake stories of revolts, marders and wholesale political arrests was the Chicago Teliume.

revolts, marders and wholesale political arrests was the Chicago Tribone. Yet in the Tribone of August 13 we find a story with the con-property of the Tribone of Faultin (Tortas Matiny Grows," and; "Use of Russian Lauguage Forbidden in the Ukraine." The story carries a Riga date the under the name of bounds bay, the most persistent and marshamed liar on the foreign staff of the Tribone and that is saying a monthful. When will the capitalist press stop lying about the Soviet Union? Not until the last capitalist sheet is fed to the flames.

The many and war departments, we are informed, have the largest expenditions and will suffer a reduction in estimates the appropriations for aviation will not suffer.

Left nearly a coincidence that Edsal Ford, president of the Ford Motor company, had a conference with the president recently on the subject of aviation? A cut in the aviation appropriation might not increase Problege's favor with the Fords or with Arbur Brissman and the Hearts new spaper varieties.

President Confliqe is pulling the old reduide election smut of ax reduction. This appeals strongly to those who can afford to pay taxes. For some mysterious reason it also appeals to those who cannot. What is kept in the posters of the rich will be taken out of the hides of the poor—the workers

Preparing the Case Against Mexico

Anhassador Sheffield is returning from Mexico for a conference with Codding and Kellogg and presumably has a carpet bag full of 'exidence' of violations of the Warren Payne agreement which provides compensation for American adventures whose convessions are revoked by the enforcement of the Mexican constitution of 100.7

of 1915.
That the Coulding-Kellogy-Sheffield conference is merely a formality which the state department thinks it necessary to observe before any public demands are made out Mexico and advantage taken to the crisis proceipitated by the hierarchy of the catalog clurch, is attinuated in a Washington dispatch to the Hearst press dated August 11 which says:
Any change in the Mexican policy of the United States will bring upon the report of Anthassader Sheffield, returning from Mexico next week, it was learned at the state department today.

Paul McKenna, national executive board member of the Minural Fer ration of Creating, maturing executive budge memory of the retains of Great British, who is now in Chicago visiting trades uniget relief funds for the British coal minera, will speak ton-get Chicago Federation of Laoor's radio station WCFL between 6:30 cclock. The WCFL wave length is 491.5 meters.

American Labor Can Get Into This Fight

THIS cartoon, taken from Lausbury's Weekly (London), represents Stanley Baldwin, British premier, in rather battered condition after his tussle over the eight-hour bill with the worker at the right. The caption reads: "The owner: 'You can't beat him Stanley: try hitting the woman or the kid instead." This is just what government has been doing, by its policy of starving the women and Children of the strikers thus hoping to force the miners to return to the pits. The government passed the eight-hough life for the miners, an increase of one hour on the workday, but the law renains a dead letter as the men refuse to recognize it.

Workers of America! Give \$5.000,000 to British Coal Strikers

By J. LOUIS ENGDAHL.

A MERICAN labor must send \$5,000,000 in financial aid to help the British coal miners continue their struggle against the British mine owners supported by the Baldwin tory government.

American labor must leave no stone unturned to stop the shipment of scab coal to Great Britain from this country.

States to accomplish in the immenuace present mesoded now. The spirit of the rank and file of labor in this country was well displayed at the last meeting of the Chicago Federation of Labor, when the British strike was endorsed unanimously, steps taken by unanimous vote to give it financial aid, and a unanimous declaration made in favor of an embargo on scab coal to England. But it is the officialdom of labor that must lead in the accomplishment of these tasks. The upsurge from the ranks must be so great that this official leadership will be pushed into action.

this official leadership will be pushed into action.

Some contributions have already been sent across. But it is a mere drop in the bucket. Not a single American labor organization has, as yet, done its bare, least of all the United Mine Workers, the American coal miners' union. The United Mine Workers of America must show their solidarity with the British coal miners by contributing at least \$1,000,000. It has raised flars, more different to the country of the state of the country of the country of the country of the state of the country o

later replaced thru a special assessment in the mean solves must see that this is done. President John L. Lewis will not do it unless he is forced to d it.

This is a testing time for the great railroad brother-hoods, the Brotherhood of Locomotive Engineers, the Brotherhood of Locomotive Engineers, the Brotherhood of Railroad Trainmen and the Order of Railway Conductors, to show whether they possess any tie of kinship to organized labor, or whether they are as charged merely job, trusts to protect the economic interests of their own members at the expense of the rest of tho working class.

Let the railroad shopmen's organizations, although the railroad brotherhoods to a contest in the railing of relief funds for the British strikers.

The miless in the huilding trades, well gaid in compari-

funds for the British strikers.

The unions in the building trades, well paid in comparison with other branches of American labor, must give to the untoot, which mean in sums not less than \$100,000 each for these international unions. Organizations like the United Brotherhood of Carpenters and Joiners, with some milliand vance close to the quarter million mark.

Joining the great general strike that broke over England on May first, the printing trades stopped the publication of the great capitalist newspapers. Perhaps this display of country to dip into their treasuries, which are well filled, or into the pockets of their members and make a good showing before their fellow carfament hirrorut the world.

THURSDAY, AUGUST 19, 1926 Feed Women and Children FOR SECRETARY and Mine Strike Is Won, OF U.M. W. OF A. Radio Appeal to U.S. Labor

PAUL McKENNA, member of the executive board of the British Miners' Federation. speaking from the Chicago Federation of Labor radio broadcasting station on the Municipal Pier, declared to the workers of the middle west listening in, who numbered many thousands, that if sufficient financial assistance can be secured to save the women and children from starvation, then the giant strike of 1,200,000 British coal miners can be won. McKenna declared:

"We appeal to the American trade unionists and the sympathetic public to save us in this great struggle. If we can only get sufficient assistance to save the women and children from starvation, WE WILL WIN THIS STRUGGLE!"

Aid the British Miners!

(Special Cable to The Daily Worker.)

MOSCOW, August 18.—In an appeal addressed to all Communist parties and to all workers, the Executive Committee of the Communist International calls upon the world profestarist to ensure at all costs the victory of the British miners.

The workers must see to it that the British General Council of Trade union a does not dare to destroy the Anglo-Russian Unity Committee that was organized thru the will of the masses to fit workers of England and of the Soviet Union, and that has for its aim the struggle for trade union unity against the capitalist offensive.

MORE IMPORTANT THAN EVER.

MORE IMPORTANT THAN EVER.

At no time, the Communist International points out, was this Committee so indispensable to the workers, and above all to the fighting miners, as now. It is the task of the British workers to compel the Ceneral Council to make its delegation on the Anglo-Russian Unity Committee agree to direct and thorogoing aid to the striking miners.

Should the General Council refuse such aid its new treachery should be immediately exposed so that its members may be replaced by new people worthy of being called the representatives of the British workers.

WAGE LEVY AND COAL EMBARGO.

WAGE LEVY AND COAL EMBARGO.

The aid to the miners must be quick and efficacious. It should be raised by wage levies all workers who are at work. The fraternal aid given by the workers of the Soviet Union to British miners must become the example for the workers of all countries to emulate. Side by side with the work of supplying material aid to the miners it is absolutely necessary organize an embargo on coal transport. The stopping of the movement of coal shipments British ports will signify a great triumph for the cause of international solidarity and be a laid to the striking miners.

Continual Turmoil in the Industry

THIS dispute arose in 1919 when the government of the day/refused to but into operation the findings, and from that date, there has been continual turmoil in the coel industry besuse in 1920 the miners were released out for these weeks, and a settlement was arrived at temporarily by the acceptance of the egreement known as the datum line. But in months before its expiration on the day decontrolled the industry time months before its expiration on the statute book. The miners at that time fought for thirteen weeks and held to go beck to work, defeated. In 1924 they were successful in increasing the minimum wage from 20 per cent to 3.13 per cent.

Labor Must Stop Scab Coal

THE APPEAL of Chicago labor, for an embargo on scab coal shipments to Great Britain want out yesterday to the whole organized labor movement thru this week's issue of the Federation News, the official organ of the Chicago Federation of Labor. The American Federation of Labor is especially urged to adi in placing an embargo on all coal intended to be used in breaking the British coal miners strike.

The motion, unanimously adopted by the Chicago Federation of Labor, as it appears in the official minutes reads as follows:

"Motion that the American Federation of Labor be urged to do all pos-sible to prevent the shipment of coal to Great Britain during the strike was made and adopted."

This action of the Chicago Federation of Labor is an invitation to other city central labor bodies, local unions, state federations of labor and international unions that are now meeting in convention to take similar position. Every ton of coul that goes to England means that the British miners must fight that much harder to win their struggle against

The Chicago Federation of Labor thru adopting the motion demanding that all shipments of coal to England be stopped for the duration of the strike shows that it realizes the need of labor all over the world to help the miners in their fight to maintain and better their conditions.

It seemed a shane when you came to realize it. This ranch had been a place where Dad readd round to rest and shoot qualty in mow that they had struck of it was the last place in the world where he could read. There were new wells to be planned and drilled, and pape lines to be run, and it to be marked, and tonaneur to be seen to, and houses and rouds and a gase-plant, and more water—there was something new every day. The books showed that nearly three million dollars had gone into the places so far, and now bad was talking about the absolute necessity of having his own refuery; his mind was full of a thousand rechained details along this line. There was a group of more receilly big capitalists who wanted to go in with him, and turn this into epoc of each of the moster of fields, with a comany cannible details along contents on the content of the con capitalists who wanted to go in with him, and turn this Info one of the monster oil fields, with a company capitalized at sixty million dollars; there would be a "tank-farm," and several dis-tributing stations. Should lead follow this rourse or should be save the business for Binny? The bay would have to decide pretty soon, did he want to shoulder an enormous burden like that, or to be other people on ry it for him? Did he want to study all kinds of thines, he Paul, or set to work and master the process of cracking distillation and understand the use of deplogmators in connection with tower stills?

Bunny's speculations upon the problem of capital and labor were not destined to remain academic. Spending his Unitation boliday at Paradise, he found Paul boding very scrious, and asking what would be Dad's attitude towards the matter of animons in his field. There was an organizer for the carpenters here, and Paul had talked with hun, and-decided that it was his here. As the capital had talked with hun, and-decided that it was his word have any concealment in his relations with Mr. Ross, Bunny answered that his father abid? Inlink men do mions, but he certainly wouldn't object to Paul's joining, if Paul thought it was right; and how they'd talk it out. So that evening they had a session, which wasn't quite the same as a class at high school. Dut helicyed in organization, he always said the and ble

a session, where was a quite time same as a case at any a scool ball believed in organization; he always said that, and his formula would apply to workingmen at least in theory. But in practice but had believed that a laber under enabled a lot of officials to live off the work of the real workers; these officials became a class by thomselves, a sort of vested laterest, and they looked out for themselves, and not for labor. They naturally had to make some excuses for their own existency, and so were apt to sife up the workers to discontent which otherwise the workers. wouldn't feel.

wouldn't feel.

Paul said that was one way in lonk at it; but as a matter of fact, it was just as apt to work the other way—the mich would be discontented, and officials would be trying to smooth them down. The officials made largains with the employers and naturally wanted the workers to fall into line. Dishril it seem more reassuable to account for disputes an industry by the fundamental fact that one group was selling labor, and the other was buying a forse dishrivative was every surprised that a nam who was buying a forse dishrivative to high as the owner.

forse didn't value it so high as the owner.

You could see Dad didn't like that, because it was a view that made his business more difficult. He said that what troubled how about muions was, they deptived a man of his personal liberty; lie was no longer a free American cilizen, he was jist a part of a machine, run by politicians, and often by grafters. What he ad usade this country great was individual enterprise, 'and we sught to protect that. And Paul said yes, but the employers had set the men a had example; they had joined a "Petroleum Employers Pederation," which ruled the industry very strictly. Paul had been told that in his sarry days Mr. Ross had paid his men a dellar a day more than regular seale, so as to get the best labor; Jou when he had got into the Prospect IIII lited, he had had to Joh the Pederation, and now wasn't allowed to pay more than the regular seale.

That was true, Dad admitted, but he hastgued to explain, he hadn't reduced anybody's wages, his binsiess had grown so fast he had put his men into higher classifications, and when he engaged new men for the old jobs, they had got the regular price. But when Paul planed him down, Dad admitted that it really was a union he belonged to, and he had secretic do his personal liberty at the control of the property of the control of the property of the control of the property of the control of the contro That was true, Dad admitted, last he hastened to explain, he i't reduced anybody's wages, his linishess had grawn so fast

The Church Offensive Weakens

The defection of considerable numbers of priests who have are expeed the government's nerms, the arrest of Estrada, the firm at titude of the government are strong support given it by the entire labor movement and be rather remarkable collues so to the carboile offensive among the masses of the American population in spite of the powerful indicate of the retailed extraction population in spite of the powerful indicate of the carboile organizations. Inter-aid prigot to weaken the position of the Mexican cataloid interactly, and it is not surprising that the church now is asking for terms.

The fact that this is a compressional year and the tending administration, probably bearful of raising any new major contracteristic, probably bearful of raising any new major contracted that the tending of the position of the Mexican and fixen imperatists ourses, now that the clumd has shown itself unddle to constant resolution on religious issues, much less Bietly.

Portions of the statement sent to President values by the Roman calledic episcopate of Mexica are worth attention of American workers. One section reads:

We award the charge of and having patient of arction of the carboile that the contraction of a distribution by stating light the question, for our strong or and for the three planes to desire the distribution by stating light the question, for our strong or another its calling enough of the contribution of American and Bill in consist of less called by a state of the carboile church has belo over the head of every progressive which it is trying to do in Weston today organize a counter resolution with American backing if the today is a counter resolution in which chards digitaries the great places of a counter resolution in which chards digitaries of the counter and the constitution of the process of the state of the counter and the constitution, begin of the progressive which is region to the production of the process of the state of the counter resolution in which chards digitarie

What is meeted in Westoo is the establishment of an elmenton system in which the enthodic church shall have no part, the sur-enforcement of the hand have and the exclusion of the church fra-political activity. This, in view of the 55 per cent filteracy of a trural masses, is particularly necessity. The 'table's government and the Mexican labor movement their attempts to accomplish these aims need and are enrithed receive the wholehearted support of the American organized lab movement and the whole working class.

Striking Miners Stand Firmly Against Owners' Plan to Increase Hours

(Special Cable to the Daily Worker)

LONDON, August 20.—The capitalist press which had been hailing the vote of the miners' delegates to place their case in the hands of the union executives for negotiations with the owners and the government as presaging the end of the strike are now trying to lay the blame upon the miners' leaders instead of the mine owners, who refused to talk peace only upon terms of complete surrender by the union.

"NOT A MINUTE ON THE DAY!"

The union executives came to the conference announcing that they would decline to discuss any proposal involving the longer workday. Herbert Smith, president of the Miners Federation, opened the conversation with a question as to what terms the owners proposed, but adding that any terms proposed. Aid for the British Miners

It is not generably known thround the American labor mose ment, we believe, that the British coal miners are dighting the coal converse for a pitiettly small herease in wages under the trementous weight of the emergency powers are.

This act, part is force but he produnation of the king at the beginning of the general strike, has not been repeated. Under its provisions, granting extraordinary powers to police, judges and the government as a whole, hundreds of miners have been arrested, and jailed.

It has been necessary for the labor meximent in England to est un sweed machinery for the alcloses of the necessary back acceptance.

It has been necessary for the defense of the person field workers and principled in meditinery for the defense of the person field workers and relief for their families. Strikking miners are being impressioned on the most flimey charges and police tards on workers' investings.

Little publicity is given to these outrages by the capitalist persons the impression which the British rules seek to create themean the world, and especially in the United States where the trade minor are in a position to give large sums for civile, is that the minors strike is being for glat out in the most peaceful mature possible and that the government has taken to special steps against the miners. The reverse is true and the personalities they say and those who are gialture side by side with them should stir American workers to greater effort in their detense.

Let no verker be fooded by any helicit that the basisted dent certain of British capitalities of British government thas take on the whole trade union novement will be started.

Unorganized Workers Challenging the Official Labor Movement

The springing up of unions of formerly unorganized workless which immediately demand to be taken into the dominant American Federation of Labor unions in their occupation or industry is a new phenomenon in the American trade union movement.

Furil recently such organizations were either under the Influence of the Industrial Workers of the World or, actuated by distributed the American Federation of Labor, assumed an independent status that lasted as long as the union did.

status that lasted as long as the union did.

The rise of such argainzations is an indication that the unorganized workers are, in the localities where these unions are formed, developing a more intelligent estimation of the American trade union movement than is to be found in official latio release. The hostile attitude towards unorganized workers that is to be found in annuy unions can be ascelled in a large part, not only to the narrow cert rouselousness of the sections of the membership, but to deliphyrate attempts on the part of the union officials to create suspicion of the unorganized, unguly the difficulties in the way of organizing thou in order to excuse their lack of activity in this important field.

Amportant near. Posservative labor officials have so far been able to wrigale anny from accessations of lack of sympathy with the struggles of workers minifiliated to any A. F. of L. mion by lond rries of "dual-lism." There is a powerful institutional tendency in the American labor movement (the American trade unionist is probably more reverent of established form and procedure than the losses are and less able to overcome tradition and divise and use new methods) and this fast been used to the limit to evide official support for great struggles like those in McKeesport, Butt's Lawrence, etc.

But when 15,000 strikers, as in Passair, not only amounter their their of becoming part of the trade union movement but noised on the district of lecoming part of the trade union movement but noised on dealing becomes difficult and the cry of draining begins to lose its punch. Not is Passale an isolated filling material for my Journel and the cry of draining begins to lose its punch. So its Passale an isolated filling material for my Journel and the cry of draining begins to lose its lose of the strike in the same and the material and dealths about oversumed must are soon as they go on strike make an application for admission of the latited Textile Workers.

In Porth Ambry, New Jersey, an organization movement beginning with a series of strikes and wage demands has occurred and, instead of hodependent unions being formed, the workers call for A F, of L. organizers and demand affiliation with resonance trade

Of a somewhat different character, but perhaps of more

Of a somewhat different character, but perhaps of more significance because it has developed without a strike, is the organization of some [2,000], electrical workers in New York ('tily who have banded together for the purpose of securing admission to the head minon of the International Berdehechood of Beetrical Workers whose jids trust character has kept these workers outside of its ranks. The incurated believes in the theory of a revolutionary union ism, secured by the organization of unions composed only of recommence of the continuous weekers, will see in the instances either ceitenes of the decay of militancy among unorganized workers. But the reverse is true, and as the desire for organization linds breader expression and begins to appear in the big basic industries, labor officialdom either will have be encourage and take part in the movement or step aside and allow organization to proceed and develop wharveer structural form is best fitted for the needs of the millions of workers outside the ranks of the trade unions and among whom no services official organizing campaign has been carried on since the steel strike of 1919-20.

SECOND WORKERS' DELEGATION FROM GERMANY NOW IN MOSCOW

MOSCOW. (a) Inprecer Telegraph Agency)

MOSCOW. August 23—The second German werkers' delegation arrived in Moscow August 4. The delegation was received enthusiatically by representatives of the trade unions and by numerous deputations of the Moscow workers who filled the station and the surrounding streets. Morning papers bring articles written in German expressing picasure at the arrival of the German workers and pointing out that the German proliferant has shown by sending this second delegation to the Soviet Union, that it is continuing to consolidate the unity of the trade union movement and that it rejects the advice of the social-demoratic leaders. The delegates (sorber, Ulmann and Gertrud Rausch declared in specehes of thanks for her reception that what they had to far seen in the Soviet Union had given term the impression that the tolling masses of the Soviet Union were really 'pable not merely of retaining over in the state but also of completing the orkers' socialist reconstruction.

In this second of a series of articles on the growth of militarism in the United States the writer tells the history of the Citizens' Military Training Cumps from their birth in the Jingo brain of the archenilitarist, Gen. Learner's Wood, to this year's Wer Department accomplishment of collecting 50,000 youth between the ages of 17 and 24 to undergo regular army training for 50 days. Every year there are more recruits to this new military meshhes, it is made all the more deadly by reason of perioding under the adapta. "Distinguishmen." It is a mething hatter than a different way of galing the benefits of universal military service without the odium of the name. It is a new way of training a reserve army for strike-breaking and cointail duty. Temerrow's story will deal with the R. O. T. C.—militarism in the schools and colleges.

INTERNATIONAL MOLDERS JOURNAL—Official organ of the International Molders' Union of North America. 64 Pages. Published monthly at Cincinnati, Ohio. John P. Frey, Editor.

THE MOLDERS UNION is a craft union and the Molders Journal is a craft union and the following the but it culturates an inclined culturates an inclined union to the accepted A. F. of L. tradition indicates from the person of its editor. This atmosphere is that of the Atlantic Moselly, criticals from this lathbrow but stelle publication their occasionally reprinted by the Noblers Journal.

heng occasionally reprinted by the conversabilities. The August number quite characteristically carries an article by W. A. Appleton, accretary of the General Pederation of Trade Unions of Great Initiation, on the Tittles labor movement. The fossilited Appleton, a pure and slapple trade unionist of the most reactionary type, arous against independent political action by the British unions in the style made fomms by the late Sam Gompers. Appleton's reference is extended a partial body to the British Trades Union Concress but it nevertheless receives the approbation of A. F. of L. odiciablem.

THERE is also on editorial article which places the himse for the failure of the littlish general strike on "annuan nature". The conclusion is worth quoting as it gives an insight into the editorial mentality:

As the Moisiers' Jearnal is egainst revolution, independent working olitical action and the general strike, it is a little hard to understand what means by "mera efficient methods," "evolutionary processes," perhops.

THE JOURNAL is against company unions and the open shop which it de nonness as "the Chinese plan." It is also-against feedism because tan-rism is against the kind of democracy enjoyed by American trade unionists

Let us hepe that the action of the American Bar Association will not only lead to a more thorough teaching of the constitution in our law schools, but that the result will be a newer generation of tudges.... We are indebted to the American Bar Association for ceiling attention to the farct that the law colleges are devening too much time to teaching the law and lawyer's methods of practice and not enough to teaching the constitution.

The Journal carries a half-dozen pages of letters from members an-ies a practice of publishing pictures of recently deceased members

Signs of a New World War

The difficulties of British foreign policy are increasing in proposition as her national economy continues to decline. Shaken at home lifest by the general strike and then by the prolonged coal strike (the importance of which has been overlooked generally because of the tremendous crisis which preceded it), British imperialism must now must a determined effort on the part of Spain backed by I tally to weaken seriously her control of the Mediterranean route to India.

Wall Street Policy in Mexico

Two conflicting tendencies are visible in the attunde of the state department towards Mexico at present. Since the sharp an favorable popular reaction to the peremptory note sent by Kelberg last fall, the interventionists have had to tone down their public attreamers, but have not ceased to bring all possible pressure upon Moxico.

Mexico.

The twoliday policy followed now, while not so immediately damperous to Mexican sovervigury, is a deadly one potentially. Am absorber Schedel evidently favors a more open interventionist uteliand rumors of pis resignation, which Kellogg has felt called upon to depy, undoubtedly are the result of his differences with the or terests which believe that Mexico is being weakened scripmsly by the internal conflict and can be forced, without intervention, to make substantial concessions to American oil and mining curporations.

The Axie York Trues for August 19 published an official line-tine with Kelleg in which the following statements are made: for relations ... over the oil and land large ... give pro-nowed of circlematic properties of the control of circlematic and to the updated state. German Miners Threaten General Strike; British Strikers Check Scabbing

Special Cable to The Daily Werker.)

BERLIN, Aug. 24.—A nationwide miners' strike in Germany threatens. In answer to the demand of miners for a raise in salary, the owners near Silesia have ordered that the wage tariffs be cancelled beginning August 31.

Feverish attempts are being, made by the government to effect a conciliation between the miners and owners on the wage issue and avert the threatened strike, which would tie up the entire mining industry of the Ruhr.

Meanwhile, Communists are spurring the workers into a destire for action, by geneding agistion in the gathering places of the same step and the strike and all mine owners of all nations are working feverishly to break the British miners' strike.

Successfully Overcome Mine Owners' Agitation

(Special Cable to the Daily Worker)

ONDON, Aug. 24.—After a few days' tour of the mining regions, where the rank and file of miners unanimously adopted resolutions against all compromise, A. J. Cook, secretary of the Miners' Federation, and other miners' leaders, declare that they have paralysed the agitation of the mine owners who were trying to incite a return to work an compromise terms designed to undermine the solidarity of the union.

It is clear that only a small percentage even in the districts most affected in Nottinghamsier and Dertyshire, have tried to return to work as individuals against the will of the great mass of their fellow workers.

Jailing British Miners Under E. P. A.

Details of the methods by which the British government is try-ing to break the spirit of the striking miners are available in in-creasing numbers and not even the most creditions believer in Brit-ish denoters, can full to see that the miners are in a life and death struggle with British capitalism and its government. We have referred to the onergetry powers act, conferring extra-ordinary powers on police, and judges, depriving the accused work ers of trial by jury and making them liable to severe prison sen-tences for actions and interances which without the E. Having put itself on record in this wise the A. F. of L. every was earthing eviticized in unity quarters some unkind persons even hinted that there was connection between local toward and the statement of the extensive commell.

However that may be, the cold fact is that now the mill barons show no greater regard for the welfare of the strikers under the painting of the A. It seems to us that these two things should be done by the A, E, b, L, leadership if it wants anyone to take seriously its ex pressed desire for the organization of the unorganized and the upbuilding of the trade union movement.

Our Estimate of the Philippine Situation Confirmed

Confirmed

We were slightly non optimistic yesterday when we inferred that the imperialists supporting the Bacon bill had failed to or ganize a More demonstration in its favor, or even a substantial demonstration in favor of continued American rule for the benefit of Colonel Farmi Thompson and the American press.

A later disparate to the New York Times states:

A delegation of Mores handed Colonel Thompson a list of Dalus, or Insula Videix, "who want the American people to giovern Lanua Province." They wrote in Arabic . . . The list warmed 490 Hotes, claiming Jound followers.

Inassunch as there are 500,000 Mores, the numerical following of the chiefs who want perpetual American rule, even if genuine, is not very impressive, but there has been an appeal for the imperialist press to play up. The Time gives it a headline, "Mores Demund American Rule."

But more important than this feeble popular support for the

Demand American Rule."

But more important than this feeble popular support for the Backo bill and the rubber interests is a statement immediately per ceeding the sentences we quote and reading as follows:

Same Aucricans of Midmana, as elsewhere in the Philippiars, realizing the danger of the situation, the possibilities of a flare up over the independence and Bacon bill issues, IF IHE AGITATION GITS OF TOF THE LEADERS HANDS AND SECONDS A REAL ANTA-HARRICAN CAMPLING, recommend the appointment of a congressional vanuitision.

cond the appointment of a congressional commission.

(Emphasis ours.)

In the concluding article on the Philippine situation published on this page today we make certain criticisms of the londership of the independence insecuent which this dispatch confirms. The failure of this beatership to organize the workers and peasants as the mass base of the movement, their entering to American respectability and the playing down of the unportance of the Philippine labor novement, has presented the strangel for national liberation decloping the defittibily anti-American capitalist character in unstabace to be effective in consolidating insetf.

As usual, when such struggles sharpen, the imperialists are looking to the middle class leadership to check its development and divert it into channels where its energy will be exhausted in fruitless endeavor.

and direct it into cannots where no very the fermiles endeaver.

Expressions like that which we quote, coming from the enemies of the Philippine liberation movement, should serve as a warning to its present leaders and convince them of the most exploited and thirefore the most determined section of the population—the work offers of the population where the most determined section of the population—the work offers of the population. ers and peasants.

Important Developments in the Trade Union Movement

A wide difference of opinion has developed with the leadership of A. F. of L. unions on the question of how far the worker employer cooperation theory and practice of the Watson Braker hill it to be extended by legislation if the report of the views expressed by President Grien during the conference of the A. F. of L. eventive council with President Codilige is regreet.

The Yor Fork True empiris the position of the A. F. of L. Official as follows:

with President Condege is regrees.

The Vew York Trace reports the position of the A. P. of Lofficial as follows:

Original as follows:

William Green ... which declaiming to appose directly the peacepile for the adjustment of deputes in other industries.

Original as follows:

Original as for industries and deputes in other industries.

ORIGINAL AS ORIGINAL ORI

once the workers of other unions become aware of the direction in which they are being led.

We must awart further information before we are able to estimate the full significance of the samements made to Coolidge, but one thing is certain; It is that pressure from below, as yet not strong and well organized and clear, is being felt by the official

usors of worker employer co operation.

The pressure must, and will be increased.

The Chicago Painfer, Union, Local 194, on Wednesday received the soakers for Ghitah minery relief, Paul McKenna, representing the circlers directly, and Anton Johansen of the Chicago Fednes on Libor. Following the addresses of these speakers, the local voted an assessment of fifty cents per member, and ordered a check drawn immeditely for an amount to cover coch assessment, a sum of 825.

This is an addition to the sum of 3125 previously given and brings the denation of Local 154 to the British strikers up to an even \$1,000.

Russian News in the Chicago Tribune

Russian News in the Chicago Iribune

Our notorious contemporary, the Chicago Tribune) waxes editorially vittions over its decision not to maintain any correspondents in the Soviet Union "as long as the Soviet continues its censorable and its bureaus of false information." The result of this "delying of a winde povernment," as the Tribune modestly puts it, that the "truth" about Russia is regularly given in its columns.

The occasion for the editorial is a supposed saving of millions of dollars to American and Canadian wheat growers by the Tribune which had some time ago said that the reports that Russia would export six hundred million bandeds of wheat were untire. The inference is that this report enamated from Russia and that the Tribune, with its superior knowledge of the sixtation, glowed from careful observance of conditions from afar, bud ridiculed the report from its inception. om its incention

tritle of the matter is this: The original report cinauated neither from Moscow nor The truth of the matter is this:

The original report commanded neither from Moscow nor Lenisgred but from RIGA. The report was videolous on the face of it, expecially in view of the fact that Societ office at timetee, eitherd to verious papers through the world, were for on entific Russian ecop of some 60,000,000 hunder. The section incuments of the Tribure is especially funny in this case when it is known that its chief source of yorked news obstactionistics and create in the Soriet I nine comes regularly out of Riya, where it maintains a correspondent who uphadds the tradition of the Tribure, one Donald Day, who is, by and large, the worst unsettled to the contractions of the ribure, one Donald Day, who is, by and large, the worst weekfuller little in severe-marchy.

of the Tribune, one Donald Day, who is, by and large, the most unreliable tripler in necespaperdom.

Another contemporary, the Chicago Injily Venes, takes occasion to remark judiciously: "Ministronation about Russia unrigitates outside of Russia—in Berlin, Incharest, Warsane, the northern border toware, particularly ligo, a viriable mendavity mill so fin as the Soriet republic is concerned." It is not without significance that the news one reads in the Tribune about Russia almust always comes from one of the cities mentioned by the Yeros.

The Tribune's claffer to truth is taken seconds:

comes from one of the cities mentioned by the News.

The Tribun's claim to truth is taken seriously nowhere except
in the environs of Chicago's Gold Coast. It was only a couple of
weeks ago that the columns of this rag were blazing away with reports about the "situation in Russia." With the aid of Donald Day, In me recommend we have been as a second property of the property of the property of the property of the second pr

contractual relations with the Peabuly Coal company at a salary (8-XL000 a) year, is one of the most sensational explosions that ever shook the American trade union movement. That Farrington was a severant of the Hilinois coal operators has long since been proved by his own actions. Circumstantial evidence pointed the accessitive image at him. His open allimose with the reactionary republican matchine, his war on the progressive elements in the union, his expulsion of active mentions who tried to make the operators hiv up to the terms of their contracts with the union all those things have proved to the satisfaction of the more intel-ligent and progressive elements ig the union that Farrington was but at t 1 of the hosess the while he was drawing a salary of \$2,000 a year, in adultion to a large expenses account as president of the district organization.

In Thomson, President Cooling's special envoy in the mapping Islands, reports that he is quite enthusiastic over the strongers for a tremendous development of the rubber industry in the Oriental possessions of the United States.

This means that the Pilipinos can go whistle for their independence so far as the United States is able to prevent it. Itself islands been barren and devoid of anything under ground or above that would tempt the acquisitive instincts of our rapitalists without unch abo.

The Filipinos, however, are as unfortunate in being natives of a country that promises to be a fertile rubber producer, as the temptor of Irak are in infability a land where oil guides forth when one stabs the earth with his walking sirk. Naw we can understand key the poet saug of the savage who loved his native home regard less of how barren the soil was. In fact that's why he liked it, it is known hostaly would come and make it away from him. Whe savage Various reasons might have being given a few years ago for the electromistion of the United Status to hold not to the Philippines. It would be to save the natives from some horrid and bruist confusers. In American imperialism is so fat that it has lost what ever little delicaes it ever possessed. American envoys and governors most fat harman and trunct them house on the unknown that the American imperialistics have added to the by are in the process of robbing. There is one old tried and trusk, the islands go hold of a lain of American imperialism and trusk the islands go hold of a bland of American interior general of the islands, go hold of a lain of American imperialism. So not any modes of the house on the uner networked cristian is highly and the population.

Some renegate More lenders were paid to say that they wanted to say under United States protection and would not be happy it is good deddy Sannay went away and left them. The wicked christian Filipines would cat poet little Mores. So on and so forth.
